4-16-2015 "Doctors See Benefits and Risks in Medicare Changes" By KATIE THOMAS and REED ABELSON NY Times

4-16-2015 Doctors... 4 MD Wives Coup D'Etat is the only WAY to even get a Front Page NY Times story about 1,001 Nobel's a Year in Medicine in our 1984 II Society. Stage 4 breast cancer deaths will go on long as our 1984 II Numb Nuts Dictators sell BP Oil + Gas while suppressing the Electric Windmill Ford Escort Era of 1984 III MD Women Dictators!

Aaron Hernandez murdered Barbara at the NY Times!

Aaron Hernandez murdered Barbara at the NY Times!

4-16-2015 Another NFL... Football Game! Patriots remained mostly silent, the NFL community littered the Internet with a wide range of reactions yesterday to Aaron Hernandez' guilty verdict. 1,001 Nobel's a Year in Medicine killed by "ESPN" mental illness caused by BP Oil Greed of \$777 Trillion "War Chest" for a fleet of JFK Super Carriers not 155 Story Eiffel Tower Medical Schools, which will be built over some Football Stadiums! You would know this... Sodium Zirconium Cyclosilicate for Urgent Therapy of Severe Hyperkalemia... you would know this + more if there was no Football on Comcast! A True Bacteriotherapy for Clostridium difficile Infections! The most promising areas of autism research would be on ESPN 24/7.

Los Alamos never came within a light year of crunching for evidence of Aliens in 777 Trillion Galaxies or desinging a New Hubble Space Telescope with State of the Arts Futuristic

Electronics Evesdropping Inventions!

Greg + Wives in Key West aren't Brainstorming on a Los Alamos Supercomputer today!

4-16-2015 Beyond Hubble: Will Future Space Telescope Seek Alien Life by doing a coup on Los Alamos... Greg + Wives in Key West aren't Brainstorming on a Los Alamos Supercomputer invention projects to hear + observe Aliens because our 1984 II numb nuts Dictators prohibit this invention project at Los Alamos!

4-16-2015 Netflix signs up new members like crazy in record-breaking quarter... 1,001 Invention Projects iApps and Hemingway House Writing Classes with a invention in every chapter has not signed up any members from Key West...

When freed 1,001 Invention Projects on a CD and my web page

4-16-2015 Beyond \$777 Trillion in gas station hold ups! President Omar Hassan al-Bashir of Sudan, in white, is wanted by the International Criminal Court on genocide charges... so are BP Oil Men!

4-16-2015 BP Oil Holocaust II... Preserving Auschwitz's Ghastly Inventory The aim of the foundation maintaining the site of the concentration camp is "to preserve

authenticity.” It is a moral stance with specific curatorial challenges. YouTube’s 1 Trillion videos of fiery cop cars + Suv’s Paris, London, Rome, LA... inventor!

Los Alamos car design engineers for the Electric Windmill Ford Escort 2015...

Greg + Wives in Key West aren't Brainstorming on a Los Alamos Supercomputer today!

4-16-2015...

When freed 1,001 Invention Projects on a CD and my web page

Barbara Strauch, a reporter and editor who wrote two books about the brain and directed health and science coverage for The New York Times for a decade, died on Wednesday at her home in Rye, N.Y. She was 63. The cause was breast cancer, her husband, Richard Breeden, said. Before joining The Times, Ms. Strauch (pronounced STROWK) ran the Newsday team that won the 1992 Pulitzer Prize for spot news for its coverage of a midnight subway derailment in Manhattan that left five passengers dead and more than 200 injured. Hired by The Times after New York Newsday ceased publication in 1995, Ms. Strauch worked on the

national desk, edited business coverage of the New York metropolitan area and was media editor. She joined the paper's science department as an assistant editor in 2000. Appointed health editor in 2004, Ms. Strauch supervised coverage of a rapidly changing health care industry, tracking advances in pharmaceutical research, the rising costs of health care, debates over health insurance coverage and the politics of medical care, as well as the changing roles of doctors and hospitals. She was named science editor in 2011, overseeing all health and science coverage in the daily news report, as well as in the weekly Science Times section. She held that post until this month. As science editor, Ms. Strauch oversaw the introduction of the popular Well blog and a number of projects, including "Chasing the Higgs," about the race between two teams of researchers to discover the Higgs boson, sometimes called the "God particle." It was a Pulitzer finalist in 2014. Other projects examined patient care, treating children with mental illness and the struggles in cancer research. "Barbara's stewardship of the science section was the capstone to an extraordinary career in journalism," Dean Baquet, the executive editor of The Times, said in a memo to the newsroom staff. "Her zest for a great story and her determination to infuse science journalism with sophistication, heart and rigor made our coverage the envy of our peers."

When freed 1,001 Invention Projects on a CD and my web page

Ms. Strauch was the author of "The Primal Teen: What the New Discoveries About the Teenage Brain Tell Us About Our Kids," published in 2003, and "The Secret Life of the Grown-up Brain: The Surprising Talents of the Middle-Aged Mind" (2010), which concluded that certain cognitive functions peak fairly late, when people are in their 60s. Responding to online questions from readers in 2009, she explained that teenagers are naturally attracted to risk, because from an evolutionary standpoint they need a biological incentive to leave familiar surroundings to mate and avoid inbreeding. Adults, she said, are better at assessing consequences. In 2010, Ms. Strauch published "The Secret Life of the Grown-up

Brain: The Surprising Talents of the Middle-Aged Mind,” which concluded that certain cognitive functions peak fairly late, when people are in their 60s. Credit Viking Adult “We have teenagers staying out all night or skipping school and their parents tearing out their middle-aged hair,” she wrote. “The good news is that, if we can get past the power-struggle part of all this, admit what we were like at that age, take the long view and call on the calmer middle-aged brain we have, we should also realize that a few bad and even risky moves by teenagers are natural and necessary, as long as they do not kill themselves. Easier said than done.” Barbara Ellen Strauch was born in Evanston, Ill., on May 10, 1951. Her father, Frederic Jr., was an electrical engineer. Her mother, the former Claire Christiansen, was a reporter for the newspaper *The Daily Pilot* in Orange County, Calif. In addition to her husband, she is survived by two daughters, Hayley and Meryl Breeden, and a brother, Ron Strauch. After graduating from the University of California, Berkeley, with a bachelor’s degree in English, Ms. Strauch worked for newspapers in New England, Venezuela and Houston. She was a senior editor at New York Newsday.

When freed 1,001 Invention Projects on a CD and my web page

Molly Gordy, a former Newsday reporter, recalled: “She sent me to interview a Salvadoran refugee family for an immigration series, and when I came back saying they were boring, she told me to pack a suitcase and move in with them and not leave until I was in love.” She stayed five days, she said. In the course of her career, Ms. Strauch dealt with subjects as diverse as space shuttle missions and police shootings, but she said in the 2009 online piece that “sorting out health news is one of the hardest I have run across, in part because of the hype and — more alarming — the financial ties and conflicts of interest of many researchers.” She lamented the decline in science coverage in other general-interest publications. “Something quite serious has been lost,” she wrote in 2013 on the website *Edge.org.*, an online discussion group. “And, of course, this has ramifications not only for the general level of scientific understanding, but for funding decisions in Washington —

and even access to medical care. And it's not good for those of us at The Times, either. Competition makes us all better." "So what we have is a high interest and a lot of misinformation floating around," she warned. "And we have fewer and fewer places that provide real information to a general audience that is understandable, at least by those of us who do not yet have our doctorates in astrophysics. The disconnect is what we should all be worried about."

4-15-2015 *Today's Tax Day! Last Minute Tips For Procrastinators...*

4-15-2015 *There is no immediate application for the findings... MreB senses the shape of the cell and moves to where rebuilding is necessary. MreB is not an enzyme itself, but it coordinates the work of enzymes, as a kind of general contractor of wall construction. It was known to work to maintain cell walls, but it also seems to be able to build them from scratch. The protein responded to a very simple signal.*

4-15-2015 *There is no immediate application for the findings, because Greg + Wives in Key West aren't Brainstorming on a Los Alamos Supercomputer today via our 1984 II Numb Nuts Dictators. If we were Los Alamos would be crunching this MreB and several more ideas from Greg + Wives in Key West Today! Taxing... is not just the IRS.*

4-15-2015 *Today's Headlines... 100000 Galaxies Yields No Evidence Of Alien Civilizations...*

When freed 1,001 Invention Projects on a CD and my web page

4-15-2015 There is no immediate application for the findings... Los Alamos never came within a light year of crunching for evidence of Aliens in 777 Trillion Galaxies as they are busy building another 100K H-Bombs for this years production. Pakistan is building some today too. When Pakistan should be building Electric Windmill Ford Escorts!

4-15-2015 777 Trillion Galaxies Yields Evidence of "Shock + Awe" War's for \$777 Trillion in BP Oil Revenues will be Hell to pay... 100 million Electric Windmill Ford Escorts sat in some Navy Dock kept from winning the Iraq War by Admirals and Admirals kids like McCain. Evidence of War Crimes! Israeli Leader Expresses Dismay Over Russian Sale of Missiles to Iran. Paris Yale Medical Sale of 155 Story Eiffel Tower Structures for Medical Schools are kept off the Front Page of the NY Times by our 1984 II Numb Nut Dictators. Palestinian Doctors Can Drive Gasoline Fueled Vehicles Into Israel, Agency Says The decision, exempting dozens of doctors from a blanket ban in force for 15 years, is the latest in a series of steps to relax constraints on Palestinians entering Israel. Israel's Jewish God knows the Top Brass are not letting anyone drive the Electric Windmill Ford Escort into Israel!

4-15-2015 777 Trillion Galaxies Goes Beyond Public Views on the Front Page of the NY Times Today.

When freed 1,001 Invention Projects on a CD and my web page

4-15-2015 777 Trillion Galaxies "Blackwater's Legacy Goes Beyond Public View" By JAMES RISEN and MATTHEW ROSENBERG NY Times

4-15-2015 777 Trillion Galaxies "Blackwater's Legacy Goes Beyond Public View" Erik Prince, the founder of Blackwater, a former member of the Navy SEALs and heir to a Michigan auto parts fortune, has spent the last few years searching for new missions, new fields of fire and new customers.

When freed 1,001 Invention Projects on a CD and my web page

4-15-2015 A Navy Seal + auto parts guy founded Blackwater while 100 million Electric Windmill Ford Escorts sat in some Navy Dock kept from winning the Iraq War by Admirals and Admirals kids like McCain. For the Glory of War in Iraq. In his 2013 memoir, "Civilian Warriors," Mr. Prince defended the actions of Blackwater as well as the guards who fired in Nisour Square, protesting that "shifting political tectonic plates crushed my company as an act of partisan theatrics."

4-15-2015 Electric Windmill Ford Escort memoir, will have Erik driving down the Paris freeway not stopping to help a fiery car crash... arrested by French Police for this! Pope Francis also drove by fiery car crash in Paris. God will arrest Pope Francis for not stopping to help those on fire! Catholic Church will go the way of Blackwater too.
