2-22-2015 Dr. Nancy shares 1,001 Nobels in Medicine a Year with Mary + Greg in Key West.. Are hospitals using dirty surgical tools? A new report suggests doctors across the country are using surgical tools contaminated with blood and other debris and because the FDA doesn't require hospitals to report it, many incidents are unknown. NBC's chief medical editor Dr. Nancy Snyderman reports. Consumer reports in CVS had a ad for the 1st self cleaning filter on the dish washer. Self Cleaning Ovens have been around for years but are not that good. Self Cleaning windows for Dr. Nancy's NYC... Self cleaning Microwaves, put the surgery tools in this grin. Sterilization Staff in the Hospital are not MD's... Yale or Dr. Nancy's favorite hospital should try putting MD a Professor in Charge and MD students as the cleaners of all the surgery tools... MD's Only on the Doors! Don't even let in anyone who is not a MD to clean the floors or take out the trash! I think this would cut hospital infections a lot!! And the MD Students would reinvent the tools. Not with Win 10 but with the MacBook Pro with Intel Xeon CPU without this Intel Xeon CPU there would not be any Major Reinventions! Trust me, Mary and Nancy. We can Share many Nobels in Medicine soon as the 1984 II Bosses let us Marry at the Hemingway House in its First Polygamous Marriage in Key West!
