Published today in the journal PAIN. One in every three women undergoing a mastectomy could potentially be spared chronic post-operative pain if anesthesiologists used a regional anesthetic technique in combination with standard care, according to a new study. Sadly, One in every three women undergoing a mastectomy the pain these women experience can be so severely debilitating that it may require treatment by a pain specialist and pain killers! Standard care for mastectomies is a general anesthetic, whereby anesthesiologists use gas to keep the patient asleep and narcotics to control pain. Up to 60 per cent of women may experience chronic pain three months after they've had the surgery and at least half of those will still suffer from this pain one year later. "Sadly, the pain these women experience can be so severely debilitating that it may require treatment by a pain specialist and pain killers," said Dr. Faraj Abdallah, lead author of the study and an anesthesiologist at St. Michael's Hospital. The regional anesthetic technique Dr. Abdallah examined when added to standard care - called ultrasound-guided paravertebral blocks- is similar to a dental freeze. Trained anesthesiologists use a local anesthetic to freeze nerves in the breast area. Paravertebral blocks allow excellent pain control immediately after surgery and help with long-term pain reduction. "Six months after breast cancer surgery, we found that women who received paravertebral blocks immediately before their mastectomies had more than 50 per cent lower risk of developing chronic pain compared to those who received standard care," said Dr. Abdallah, who is also an assistant professor in the Department of Anesthesia at the University of Toronto. The study, published today in the journal PAIN

Women are very used to bleeding throughout their lives, it's not always regular and is interrupted by pregnancy, for example, or the contraceptive pill. They do not always recognize abnormal bleeding for what it is, mistaking abnormal bleeding for, say, onset of menopause. Women are often reluctant to talk about bleeding; a 2014 survey of women aged 16 to 25 found that many lack even the language to talk about gynecological health,8 resorting to euphemism such as "lady bits". From Wikipedia, the free encyclopedia

Joseph Mallord William Turner, RA (baptised 14 May 1775^[a] – 19 December 1851) was an English Romanticist landscape painter, water-colourist, and printmaker. Turner was considered a controversial figure in his day, but is now regarded as the artist who elevated landscape painting to an eminence rivalling history painting.^[1] Although renowned for his oil paintings, Turner is also one of the greatest masters of British watercolour landscape painting. He is commonly known as "the painter of light"^[2] and his work is regarded as a Romantic preface to [Impressionism](#). Some of his works are cited as examples of abstract art prior to its recognition in the early twentieth century.

Driver gets 10 years for deadly crash

BY ADAM LINHARDT Citizen Staff alinhardt@keysnews.com A Miami man charged with manslaughter in a fiery head-on crash in Islamorada that killed a woman was sentenced to a decade in prison Tuesday. Didier Kichner Miles, 26, pleaded guilty to DUI manslaughter, DUI with serious bodily injury, two counts of DUI with property damage and one count of leaving the scene of an accident as part of a plea

agreement with prosecutors. Circuit Judge Luis Garcia then sentenced Miles to 10 years in state prison followed by five years probation. Miles was also ordered to complete DUI School, complete 50 hours of community service -- 10 hours of which must be speaking at schools regarding the dangers of drinking and driving -- a 10-day vehicle impoundment, consume no alcohol while under supervision and pay restitution to the victims, said State Attorney Catherine Vogel. Miles drivers license was also permanently revoked. "This was a terrible tragedy," Vogel said. "This young man was friends with the victim and her family. This is an example of how dangerous it is to drink and drive." Assistant State Attorneys Demetrios Efstratiou and Erika Isidron prosecuted the case. Kristine Marie Rivera, 22, a passenger in the car Miles was driving, was killed in the crash. Florida Highway Patrol described the deadly May 2013 crash and the events leading up to it as follows: Rivera initially was driving a Honda Element and rear-ended another Honda at Mile Marker 85.1, south of Snake Creek Bridge. Miles reportedly offered the other driver cash, but it was declined. So they left, with Miles now driving the Element. He reportedly sideswiped another vehicle while leaving that scene. Miles continued north over the bridge and into Islamorada, where he apparently lost control and hit a taxi, which caught fire. Responding law enforcement officers quelled the blaze. Taxi driver Charles Akullian was seriously injured in the crash. Both Rivera and Miles were airlifted to Miami. He later turned himself into law enforcement. U.S. 1 was closed for five hours in both directions while troopers worked to clear multiple crash scenes.

1984 II Numb Nuts Dictators look into the purse of the 1984 III Women MD Dictators and find \$777 Trillion to send adult dancers to a Medical School. Yale Key West Med School never thought of being built by our 1984 II Numb Nuts!

"Passed-out driver jailed for drugs in purse" CITIZEN STAFF A Key Largo woman was jailed after she was found passed out

behind the wheel of her running car Monday on Sugarloaf Key with a purse filled with illegal drugs, the sheriff's office said. When asked why she had all the drugs -- including morphine, cocaine and oxycodone -- the woman replied, "it was because her back hurts from being an adult dancer," Deputy Becky Herrin said Tuesday. Kayla Gregg, 23, a stripper who works in Key West, faces five felony charges of illegal drug possession. A sheriff's office deputy found her car on the side of the road at about 10:30 a.m. at Mile Marker 15 and knocked on the window to wake her up. Sgt. Ken Fricke asked for identification and said when Gregg reached into her purse he saw a plastic bag that appeared to contain marijuana, according to the sheriff's office. When asked what was inside the bag, Gregg lifted it from her purse but brought out another plastic bag with white powder on it, Fricke reported. The powder tested positive for cocaine and Gregg was arrested. Inside her purse, Fricke said he found oxycodone, morphine, Vyvanse -- a type of amphetamine -- and Tramadol, marketed as relief for pain. She also had a smoking pipe, Fricke said. Gregg remained jailed Tuesday in lieu of \$12,000 bond. When found inside the idling Pontiac Vibe on Monday morning, Gregg was behind the wheel partially dressed, Fricke said. She had one breast exposed and her skirt pulled up around her waist, the arrest report said.

2-24-2015 Scenarios from Greg + Wives when we get to Los Alamos; Even now, the issue continues to divide communities... New York's Fluoridation Fuss, 50 Years Later. SCAM Greg was a teen when they put Fluoridation in the H₂O and now I have dentures after 5 root canals and 1 trillion cavities. Scenario that Greg + Wives in Los Alamos will reinvent Fluoridation with a New Name as something that prevents Cavities 100% like the Electric Windmill Ford Escort will Bankrupt Oil 100% when not suppressed by the Dentists, grin!

2-24-2015 Scenarios from Greg + Wives... Panobinostat was able to selectively target triple negative breast cancer

(TNBC) cells by inducing hyperacetylation and cell cycle arrest at the G2-M DNA damage checkpoint, partially reversing the morphological changes characteristic of breast cancer cells.

2-24-2015 Scenarios from Greg + Wives... Panobinostat has been found to synergistically act with sirolimus to kill pancreatic cancer cells in the laboratory in a Mayo-Clinic study. In the study, investigators found that this combination destroyed up to 65 percent of cultured pancreatic tumor cells. The finding is significant because the three cell lines studied were all resistant to the effects of chemotherapy - as are many pancreatic tumors.

2-24-2015 Scenarios from Greg + Wives... Mechanism of action... Panobinostat inhibits multiple histone deacetylase enzymes, a mechanism leading to apoptosis of malignant cells via multiple pathways,

2-24-2015 Scenarios from Greg + Wives... β -Lactam antibiotics "penicillin" inhibit the formation of peptidoglycan cross-links in the bacterial cell wall; this is achieved through binding of the four-membered β -lactam ring of penicillin to the enzyme DD-transpeptidase. As a consequence, DD-transpeptidase cannot catalyze formation of these cross-links, and an imbalance between cell wall production and degradation develops, causing the cell to rapidly die.

2-24-2015 Scenarios from Greg + Wives... "Penicillin" puts a hole in the Gram-negative bacteria. The thin peptidoglycan layer of their cell wall is sandwiched between an inner cell membrane and a bacterial outer membrane. Penicillin puts a hole in their cell wall causing the cell to rapidly die.

2-24-2015 Scenarios from Greg + Wives... The term "penicillin" is often used generically to refer to benzylpenicillin (penicillin G), procaine benzylpenicillin (procaine penicillin), benzathine benzylpenicillin (benzathine penicillin), and phenoxymethylpenicillin (penicillin V). Procaine penicillin and benzathine penicillin have the same antibacterial activity as benzylpenicillin but act for a longer period of time. Phenoxymethylpenicillin is less active against gram-negative bacteria than benzylpenicillin. [2] [3] Benzylpenicillin, procaine penicillin and benzathine penicillin are given by injection (parenterally), but phenoxymethylpenicillin is given orally

2-24-2015 Scenarios from Greg + Wives... Novartis blood cancer drug Panobinostat wins you 6 months Swiss drugmaker Novartis approval is for use of the panobinostat in patients with relapsed multiple myeloma who have received at least two prior standard therapies, including bortezomib (Velcade, Millennium) and an immunomodulatory agent. Panobinostat is approved for use in combination with bortezomib and dexamethasone. The drug is a first in a new class of agents that act as inhibitors of histone deacetylases.

2-24-2015 Scenarios from Greg + Wives... "Panobinostat has a new mechanism of action that distinguishes it from prior drugs approved to treat multiple myeloma, making it a potentially attractive candidate agent," said Richard Pazdur, MD, director of the Office of Hematology and Oncology Products in the FDA's Center for Drug Evaluation

and Research Panobinostat carries a boxed warning alerting patients and healthcare professionals that severe diarrhea and severe and fatal cardiac events, arrhythmias, and electrocardiogram changes. Approval is part of the FDA's accelerated approval program.
