5-28-2015 "Brainstorming Search Engine" Rheumatoid arthritis.. "That's what we did and that was the breakthrough experiment." The first critical test of this exciting hypothesis was to cut the vagus nerve. When Tracey and his team did, injecting the anti-inflammatory drug into the brain no longer had an effect on the rest of the body. The second test was to stimulate the nerve without any drug in the system. "Because the vagus nerve, like all nerves, communicates information through electrical signals, it meant that we should be able to replicate the experiment by putting a nerve stimulator on the vagus nerve in the brainstem to block inflammation in the spleen," he explains. "That's what we did and that was the breakthrough experiment."

Newman was arrested for fraud in Manhattan. Second Story is Police are investigating the stabbing of a Yale student and the probable suicide of the alleged attacker, also a Yale student. At 5.27 a.m., New Haven police were called to the Taft Apartments at 265 College St., where Alexander Michaud '17 had been stabbed, reportedly by Tyler Carlisle '15. According to initial reports, Carlisle, who graduated with a B.A. in philosophy last Monday, stabbed Michaud moments before jumping from the ninth floor of the building and landing on the third-floor terrace. He died at the scene. In a college-

wide email, Yale College Dean Jonathan Holloway informed members of the community that Carlisle had died after falling from a window of the Taft Apartments and that Michaud was recovering from stab wounds at Yale-New Haven Hospital. At least one witness has been interviewed, according to a release from the NHPD. Michaud and Carlisle were close friends, according to numerous students, and both were members of the Party of the Right, a constituent party of the Yale Political Union. The students also shared a hometown: Manchester, New Hampshire. At the time of his death, Carlisle had plans to join the United States Army!
