11-15-14 Unlikely to Brainstorm a Rx Cure for Breast Cancer
with Mary B + MD Wives in next 2 weeks!! Maybe not so
"UNlikely" as Jimmy Carter + Rosalynn Carter TODAY know +
realize poison deisel particles land on the Cruise Ships they
take and are TODAY in the blood of all Jimmy + Rosalynn's
grand kids and great grand kids so it's not that...
"UNLIKELY" Greg + Mary B. will get to have a hours long
conversation in our 1984 II Society!!

11-15-14 adjective: unlikely; comparative adjective:
unlikelier; superlative adjective: unlikeliest not likely to
happen, be done, or be true; improbable.

11-15-14 1984 II it's very likely \$777 Trillion in Oil Revenues
from Gas Station Hold ups... will END!!

11-15-14 Unlikely to Brainstorm a Rx Cure for Breast Cancer
with Mary B... unlikelier is the 1984 II "Womens Club" makes
contact with Greg, but not Mission Impossible as a MD
womens Coup is unlikeliest after reading the News from
France, and no news Headlines from Paris about fiery Cop
Cars + SUV's as you know its very likely there will be a fiery
wreck in Paris today! Very likely this will be classified a "War
Crime".

11-15-14 Unlikely to Brainstorm a Rx Cure for Breast Cancer

her walker along down Olivia heading to Hemingway House
would be her "accident" and reason for the walker. Likeliest
is I will reinvent the walker.

The U.S. Department of Energy said on Friday it is spending \$425 million to research extreme-scale computing and build

two super-computers, which would be the world's fastest, for research into basic science as well as nuclear weapons. The DOE is awarding \$325 million to build "Summit" for Oak Ridge National Laboratory in Tennessee and "Sierra" at the Lawrence Livermore National Laboratory in California. An additional \$100 million will go to research into "extreme scale Supercomputing" technology as part of a program called FastForward2, the DOE said in a news release.

When freed 1,001 Invention Projects on a CD and my web page

The supercomputers, made with components from IBM, Nvidia and Mellanox, will run five to seven times faster than the United States' current fastest computers. Summit and Sierra will operate at 150 petaflops and 100 petaflops, respectively, compared to the world's current top super-computer, the Tianhe-2 in China, which performs at 55 petaflops, Nvidia said in a separate news release. IBM built the first supercomputer to reach 1 petaflop, a precise measure of how fast computers calculate, in 2008, also for the Department of Energy.

When freed 1,001 Invention Projects on a CD and my web page

Researchers worldwide will be able to apply for time to use the Summit computer. The National Nuclear Security Administration will use Sierra "to ensure the safety, security and effectiveness of the nation's nuclear deterrent without testing," Nvidia said. Santa Clara, California-based Nvidia is best-known for its high-end personal-computer graphics chips favored by gamers. In recent years it has developed more advanced versions of those chips suitable for parallel processing on supercomputers and in data centers. It has also been working with IBM to develop future chip offerings for high-end enterprise customers.

11-10-14 Men, Women & Children follows the story of a group of high school teenagers and their parents as they attempt to navigate the many ways the internet has changed their relationships, their communication, their self-image and their love lives. The film takes on social issues such as video game culture, anorexia, infidelity, fame hunting and the proliferation of illicit material on the internet.
