Three 13-year-old girls, including a pair of twins, were killed by a hit-and-run driver Friday evening while they were trick-or-treating in Santa Ana, police said.

Navy gas station hold ups killed these 3 13 year old girls via laser guided fighter jets not cars!

11-1-14 Conventional mirrors reflect light by interacting with the electrical component of electromagnetic radiation. Beyond reversing the image, they also reverse light's electrical field. This presents a problem at the mirror's surface, where the opposing frequencies cancel each other out. For scientists, this means that things like quantum dots are unable to interact with light at the surface.

Polygamous Marriage will replace Marriage that leads to murder by troops coming home from Iraqi Wars + Drunk Men murdering their wives, and of course "OJ" marriage of revenge years after a divorce! I don't have the statistics on these in the USA or World Wide but I expect to observe thousands of dead murdered women Today. If Google would have put half these murdered women on a YouTube it would have saved a few thousand, who would be alive today. Failure!!

11-1-14 First orbiter, Enterprise, was built purely for Approach and Landing Tests and had no orbital capability. Four fully operational orbiters were initially built: Columbia, Challenger, Discovery, and Atlantis. Of these, Challenger and Columbia were destroyed in mission accidents in 1986 and 2003 respectively, in which a total of fourteen astronauts were killed. A fifth operational orbiter,

Endeavour, was built in 1991 to replace Challenger. The Space Shuttle was retired from service upon the conclusion of Atlantis's final flight on July 21, 2011.

11-1-14 Columbia was destroyed at about 09:00 EST on February 1, 2003 while re-entering the atmosphere after a 16-day scientific mission. The Columbia Accident Investigation Board determined that a hole was punctured in the leading edge on one of Columbia's wings, made of a carbon composite. The hole had formed when a piece of insulating foam from the external fuel tank peeled off during the launch 16 days earlier and struck the shuttle's left wing. During the intense heat of re-entry, hot gases penetrated the interior of the wing, destroying the support structure and causing the rest of the shuttle to break apart.
