11-29-14 Oil Men + World Leaders in Paris today will look over their shoulders to see how far behind them "God" is!

11-29-14 Day after the Big Bang movie of Hawking's "The Theory of Everything" I reviewed the Movie with Mary who went to see the "Drummer Movie" will I said The Point to "The Theory of Everything" is that dissecting "Time" down to its "Inventor" as no one at the Pentagon or KGB would or could believe time created itself. Once we Inventors get "Time" dissected to it generation along with gravity the World Leaders who are 1984 II Mass Murderers who don't have any plans of changing their murderous ways long as there is \$777 Trillion from oil in everyone's "War Chest" for MIT state of the Arts Laser Guided cars... no, fighter jets and missiles. Nukes too. Today will Monday Los Alamos scientists will be hard at work a more powerful Nukes that are smaller and weigh less... never ending until "Time" is dissected as "God".

11-29-14 Late in 1980 Greg watched on Teddy Kennedy's 1984 hidden cameras invented the Electric Windmill Car

which ended the worst Saudi Arabia Oil Embargo, gas station lines in the USA were miles + miles long... Teddy Kennedy + Jimmy Carter + Rosalynn Carter gave this Godsend of \$777 Trillion to Saudi Arabia, Mecca, Allah. Looking back the 17 Terrorists from Saudi Arabia would be "Homeless Arabs" in Mecca without the money Carter, Kennedy + Rosalynn gave them since ... "Before Steven Hawking in 1983".

11-29-14 Early in 1983, Hawking...

11-29-14 Early in 1983, Hawking first approached Simon Mitton, the editor in charge of astronomy books at Cambridge University Press, with his ideas for a popular book on cosmology. Mitton was doubtful about all the equations in the draft manuscript, which he felt would put off the buyers in airport bookshops that Hawking wished to reach. It was with some difficulty that he persuaded Hawking to drop all but one equation. [4] The author himself notes in the book's acknowledgements that he was warned that for every equation in the book the readership would be halved, hence it includes only a single equation: $E = mc^2$. The book does employ a number of complex models, diagrams and other illustrations to detail some of the concepts it explores.
