11-7-14 At \$864,319, the average pay package given by the University to 10 of Yale's top administrators...

11-7-14 Yale Cross Campus was busy today, I copied this article below, it reads like the Post Office pay package. I think they do get more... no grin. Cadets at West Point are getting more than Yale Top Brass as the Cadets at West Point know the Electric Windmill Ford Escort Suppression is a War Crime and Holocaust II killing Billions!

11-7-14 Apple 5K 55" Monitor replaces conventual License Plates on cars + trucks! Wow! 2 more front + rear cams built into the 55" License Plates with audio so you can record the Road Rage Drivers, sound activated recording! Falling asleep at the wheel will finally get a wake up invention, and no drunk drivers! Zero!!

11-7-14 Supreme Court agreed Friday to consider a major new challenge... to our 1984 II Numb Nuts Dictators with syphilis on the brain. Supreme Court agreed Friday to consider a major new challenge... to \$777 Trillion more in Oil Revenues via suppressing the Electric Windmill Ford Escort + the 1 Trillion Euphoric discoveries + inventions this will give Humanity. Jimmy Carter's Habitat for Humanity is a War Crime they will rule. God will create a Hell of burning gasoline for Jimmy Carter's 1980 suppression of all this!

11-7-14 Supreme Court in our 1984 II Society... THIS DAY IN

YALE HISTORY 1969 A ruling issued by the Connecticut Attorney General dismisses the validity of non-municipal police departments, temporarily calling into question the role of the Yale Campus Police. 800 cops burned in fiery cop car wrecks will question Yale Top Brass after the Coup... Kerry, Bush, I bet they abused their Prostitutes as Yale Students!

11-7-14 Yale Student who wrote this, Pedestrian accident raises traffic concerns... By Jiahui Hu. Knows the Navy gas station hold ups killed the 81 year old women as the Navy top brass got laser guided fighter jets not cars in New Haven around Yale Campus... Yet he writes this story as if there were NO Suppression of laser guided electric windmill Ford Escorts. Pedestrian accident raises traffic concerns... By Jiahui Hu, contributing reporter... A fatal motor vehicle-pedestrian accident last Thursday has sparked discussion over pedestrian safety in New Haven. Last Thursday, an 81-year-old woman was killed crossing the intersection of Olive and Greene Streets in the Wooster Square neighborhood. The New Haven Independent reported on the incident, and commenters on the eventual article debated whether a lack of proper traffic safety regulations in the Wooster Square neighborhood influenced the accident. Commenters argued that there are inappropriate street designs, a lack of pedestrian protection initiatives and inadequate police enforcement in New Haven. Aaron Goode '04, a member of the Wooster Square Community Management Team, said that while the investigation into the driver's role is significant, he hopes the accident will also provoke discussion about pedestrian safety.

Yale... Enough alcohol to call it rape? By Nicole Ng and Vivian Wang

## When freed 1,001 Invention Projects on a CD and my web page

On March 22, 2013, two Yale undergraduates had sexual intercourse. The female student was intoxicated. The male student was not. Thirteen months later, on April 22, 2014, the female student filed a formal complaint with the University-Wide Committee on Sexual Misconduct, alleging that the sex had not been consensual. Throughout September and October, the UWC hired a fact-finder and held a hearing to determine whether the male student – the respondent – had violated the University's sexual misconduct policies. In its final report dated Oct. 31, the UWC stated that the respondent had not violated University sexual misconduct policy. The panel recommended that the respondent and complainant have no direct or indirect contact for the remainder of their time at Yale.

## When freed 1,001 Invention Projects on a CD and my web page

According to the timeline of UWC procedure, Yale College Dean Jonathan Holloway – the final decision maker in all cases where the complainant is an undergraduate – was supposed to announce his final decision by Tuesday. As of late Thursday evening, the complainant had not received the decision. Holloway declined to comment for this story on Thursday afternoon. Over the course of the investigation, dozens of pages of documents were compiled that detail both parties' version of the events. These documents, which the complainant provided to the News, include interviews, emails and text conversations. They also comprise the fact-finder's report and the UWC's final recommendation. The documents offer an inside look at UWC proceedings, which are normally confidential, and reveal what happens when a student files a formal complaint of sexual misconduct at Yale. They also highlight a process that has come under criticism as recently as this week for arbitrary decision-making and inconsistent procedures. The UWC dates to April 2011, when then-Provost Peter Salovey announced the body's formation shortly after the Department of Education's Office

for Civil Rights announced an investigation into Yale's compliance with Title IX, the federal gender equality law. The documents reviewed by the News paint a picture of a thorough process that, in this case, weighed an abundance of often ambiguous evidence, including messages perhaps fully understood only by the parties themselves. At certain points, however, the process did not abide by its own guidelines, the documents show.

When freed 1,001 Invention Projects on a CD and my web page

When freed 1,001 Invention Projects on a CD and my web page

In her capacity as independent fact-finder for the case, supervisor at the Yale Child Study Center's Trauma Section Miriam Berkman LAW '82, who did not return request for comment, recorded the accounts of both the complainant and respondent, collected evidence and conducted interviews for a 43-page report. Among others, this document, dated Oct. 15, provides the basis for the narrative of this story. In an effort to protect the privacy of the students involved, the News has chosen to withhold the names of the complainant and the respondent, as well as details about the location of events. UWC Chair David Post and University Title IX Coordinator and Deputy Provost Stephanie Spangler did not return requests for comment. The News contacted the respondent by email to give him an opportunity to comment, but he did not reply. The University responded to a request by the News for comment with a written statement emailed by University Spokesman Tom Conroy. "The University is eager to advance open community discourse regarding its sexual misconduct procedures. That said, we will not provide details of specific cases, nor will we support the efforts of others to do so," Conroy wrote. "We believe that members of our community will hesitate to bring forward their complaints or participate in the process if they fear that their cases may be publicized and that confidential documents may be made public." Eden Ohayon '14, who also filed a

formal complaint with the UWC last May, said Yale's sexual misconduct policies are superb on paper. However, she said, if the University does not abide by these policies in reality, complainants have the right to publicize their claims.

### When freed 1,001 Invention Projects on a CD and my web page

Ohayon added that the UWC did not resolve her complaint according to its own timeline. A process that was supposed to take 60 days took four months, she said. "Yale can't just hide behind this confidentiality clause that they make you enter into as a part of filing a formal complaint," Ohayon said.

THE NIGHT IN QUESTION: MARCH 22, 2013 The night of the alleged assault, the female student was drinking and playing games with friends in her suite when she received a text message from the would-be respondent. According to the accounts of both students, they had been involved in a brief yet exclusive romantic relationship the previous fall. At the time of the incident, they were not engaged in an ongoing romantic relationship. They had agreed to end all sexual contact just days earlier, during spring break. By both students' accounts, the male student still had strong feelings for the female student that were not reciprocated. At 7:18 p.m., the male student texted the female student, and a conversation ensued. The male student said he was alone in his room working. At 8:57 p.m., the female student texted the male student that she was "tipsy" and had started playing drinking games. By this point, she had moved to the suite of some other students in her entryway, according to cell phone screenshots obtained by the fact-finder.

### When freed 1,001 Invention Projects on a CD and my web page

The students continued to text as the female became increasingly intoxicated. At 9:45 p.m., she texted the male student explaining the drinking game she was playing, ending with, "I'm so hammered I can't even..." According to the complainant's account in the fact-finder's report, the text conversation was "insignificant chitchat" until the male

student said in response, "Make sure to keep texting me though, you're clearly pretty trashed and I wanna make sure you're okay : )" Since the two had previously hooked up while intoxicated, this message set off an internal alarm, according to the complainant's account included in the fact-finder's report. She said she felt the conversation was headed down a familiar path – one repeated throughout the spring – that would end in a sexual encounter she no longer wanted. Anticipating that she would become more intoxicated, the complainant said she sent the messages to protect herself against the possibility of that outcome.

### When freed 1,001 Invention Projects on a CD and my web page

"Don't let me try to seduce you though," she texted him, followed by a second text: "Because that is a distinct possibility." TEXT MESSAGES: MARCH 22, 2013 However, the respondent said he did not interpret those texts in the same way. According to his account in the fact-finder's report, the messages came as a surprise to him, in light of their agreement earlier in the month to simply remain friends. In her next text, the female student alleged, she continued to express that she did not want to have sex. "I mean... sex is awesome, and I might try to get it from you. But I shouldn't. I don't think," she wrote. After the male student responded that he was interested, adding that sex would not be a "big deal," the female student said she did not immediately respond for several minutes. This was another attempt to avoid a sexual encounter, she said in the fact-finder's report. Still, according to the fact-finder, the male student interpreted the female student's texts as "ambivalence," not an explicit refusal of a sexual encounter.

### When freed 1,001 Invention Projects on a CD and my web page

Several minutes after receiving no answer, the male student sent a second text saying his roommates were not present and his roommate's bed was "looking rather comfy." The female student responded, "None of my roommates are here

and I'm too hammered to make it to [your dorm]. Is this a bad idea..." In a June 3 written response to the formal complaint that he had received notice of five days earlier, the male student said it seemed like the female student had changed her mind about just being friends. However, the fact-finder reported that he sensed "uncertainty" and "ambivalence" in the female student's texts, and decided to have a face-to-face conversation to resolve the situation. He told the fact-finder that this conversation was the reason he went to her room — not necessarily to have sex. "Nope," he responded to the female student's previous text, "cause I'm gonna wear your favorite outfit: ) I'm on my way." The complainant then responded, "Goto [sic] my room I'll be there soon." The male student said he interpreted her message as an invitation. Yet, the female student said the text did not indicate consent. Rather, she said she thought he would persist until she acquiesced. In a relationship she characterized as "highly emotional and volatile," the male student would often respond to a refusal with "screaming, crying and other histrionics that she found overwhelming," she said. According to her account in the fact-finder's report, she was too intoxicated to have the cognitive or emotional ability to find another solution and simply capitulated. When the female student returned to her suite, the male student was waiting for her. According to the male student's written response, when the female student entered the room, "little more than 'Hello' was said before she grabbed [him], kissed [him] and [they] began to have sex." He claimed they each undressed themselves. They had sex twice that night, he said, and once more in the morning. Each time, the respondent said, the complainant was "an enthusiastic participant." The male student said that though he knew she had been drinking, he had no idea how much alcohol she had consumed and did not know she was significantly impaired. He said that after their second sexual encounter that night, the complainant said she was sober. According to the fact-finder's report, the female student said she remembers nothing more than stumbling back to her room and having sexual intercourse once with the male student. The next morning, she said, she woke up feeling terrible that she had become so inebriated and had

sex despite not wanting to. She said she immediately blamed herself, lying in bed silently crying with her back turned to the male student. When he initiated sex that morning, the female student said she did not resist because she felt refusal would be too emotionally exhausting. When she reread her texts that morning, she said she did not remember sending most of them. She could not recall exactly how much she had had to drink that evening. She later estimated that she had at least one drink of vodka and three beers. THE IMMEDIATE AFTERMATH: SPRING 2013

### When freed 1,001 Invention Projects on a CD and my web page

While the complainant said she was upset with the events of March 22, she did not initially consider the encounter to be an instance of sexual misconduct. A few days later, however, the complainant was surprised when her friends said the respondent's actions constituted rape because her level of intoxication rendered her unable to give consent. On March 28, 2013, the female student sent the male student an email warning him to never engage in sexual activity with anyone as drunk as she had been that evening because that could constitute sexual misconduct. She emphasized, however, that she was simply looking out for him and did not plan to take any disciplinary action. Disturbed by the message, the male student forwarded the email to his residential college dean, who advised him to meet with the female student to discuss the situation. In an interview with the News, the complainant said the dean never contacted her after receiving the forwarded email.

### When freed 1,001 Invention Projects on a CD and my web page

The female student said she reluctantly met with the male student over lunch. According to her account in the fact-finder's report, she told him that the evening of March 22 had been different from their previous casual sexual interactions because he had ignored her decision in early March to end all sexual contact. The male student, however,

told the fact-finder that during this meeting, the female student expressed that she was not hurt, and that their encounter had been consensual. The complainant said she does not remember saying anything to that effect. For the remainder of the semester, the two had limited contact. On May 27, 2013, the male student sent the female student an unsolicited email, included in the fact-finder's report, that detailed how he thought she had changed over the past year. A few hours later, the female student responded angrily, writing that he had sexually pressured and manipulated her during their relationship – views she would later express to Berkman during the fact-finding process. She described that in the two months since March 22, her emotional reaction to the male student's presence had only escalated, stating that the mere sight of him could make her want to cry or vomit. In her email, the female student also directly accused the male student of sexual misconduct during the night in question for the first time. "I can't figure out quite where to start, so let's just start with objective fact: you raped me," she wrote. "You are a rapist."

ONE YEAR LATER: COMPLAINT FILED On April 17, 2014, the complainant visited campus for the first time since taking the 2013-14 school year off. Once she realized that she would see the male student around campus when she returned full-time in the fall, she visited the Sexual Harassment and Assault Response Education center she told the News. Over the course of the next few days, the female student met with a SHARE counselor and Pamela Schirmeister, the Title IX coordinator for Yale College at the time. She decided to file a formal complaint.

### When freed 1,001 Invention Projects on a CD and my web page

Faculty, students respond to high admin salaries By Jed Finley and Finnegan Schick At \$864,319, the average pay package given by the University to 10 of Yale's top administrators has sparked conversation on campus. The salaries of these administrators, including the University president, vice presidents and provost, were made public through Yale's Form 990, which is filed with the Internal

Revenue Service annually as part of the University's tax exempt status. Linda Lorimer, the vice president for global and strategic initiatives, and Dorothy Robinson, the University's general counsel, took home \$1,748,767 and \$1,666,175 in 2012, respectively – figures higher than the average as both administrators received supplemental retirement packages. While these were the salaries that attracted the most attention, several students and faculty interviewed expressed criticism on the size of supplemental compensation packages for multiple high-level administrators. Four out of nine faculty interviewed said that while they praise Lorimer and Robinson for their hard work, the average pay for administrators suggests a shift toward corporatization at Yale.

### When freed 1,001 Invention Projects on a CD and my web page

“The problem is not whether, in the abstract, [Lorimer] deserves such a handout, but rather its discrepancy with academic salaries. And that signals the increasing shift at Yale and most other universities toward corporate models of management,” theater studies professor Murray Briggs said. According to an Association of American University Presses report on Yale and institutions comparable to it, the average salary for a Yale professor in 2013-14 was \$192,200, which is 7.8 percent lower than Harvard's for the same year. The average salary for a Yale associate professor is \$118,300, while for an assistant professor it is \$95,900. Sociology professor Ronald Eyerman said he thinks the pay packages had dangerous implications for the future of education. “I'm embarrassed to think of education as an ‘industry’ and a university as a ‘corporation’,” said sociology professor Ronald Eyerman. Branford Master Elizabeth Bradley, meanwhile, said that the University needs to at least be in the “mid-range” of other competing universities and employers to attract and retain the top talent.

### When freed 1,001 Invention Projects on a CD and my web page

Speaking of Lorimer and Robinson, Bradley noted that “both women have made enormous contributions to Yale over three decades, and seeing this in the context of their whole careers and gifts to Yale would be important.” Penelope Laurans, a special assistant to the University president and the master of Jonathan Edwards College, said Lorimer and Robinson devoted themselves “heart and soul, round the clock,” to the toughest leadership assignments. Yale is not the only University to provide its administrators with high salaries. Further, School of Management Professor Jeffrey Sonnenfeld said he was amazed at how administrators at other elite schools have used their positions to acquire wealth. Computer science professor David Gelernter said he understands why Yale needs to pay “absurd” salaries to retain the talent necessary to run the University. Gelernter added that in an ideal world faculty would be paid more, but that most of them are passionate about what they do and loyal to the institution regardless.

### When freed 1,001 Invention Projects on a CD and my web page

“Yale has been good to me, from the very start. I’m grateful and I love this place. I wish they paid a living wage – but you can’t have everything,” Gelernter said. School of Public Health Dean Paul Cleary said Yale does not offer supplemental compensation to its administrators on an annual basis. Instead, additional compensation is given as an incentivizing tool for the most talented administrators to stay at Yale, he added, and as supplemental retirement benefits – as was the case with Lorimer and Robinson.

“Usually, if you separate it out, their compensation is not oversized, they’re not getting this on an annualized basis – this was a lump sum,” Sonnenfeld said. Cleary added salary levels were determined after careful analyses of comparable salaries at other institutions. Four out of eight students interviewed said they are displeased with how Yale currently allocates funds, but also were not overtly critical of the pay packages given to Lorimer and Robinson. Wendell Adjety ’18 said Yale should relocate some of its funds toward professors and away from administrators. He added that he would like

*to see professors in the humanities and social sciences paid more competitively.*

**When freed 1,001 Invention Projects on a CD and my web page**

*Lina Xing '17 also said she thinks the discrepancies between administration and faculty salaries and pay packages at Yale should not be so large. But Xing added it makes sense for administrators with greater responsibility to receive a higher pay. The pay packages of 22 Yale faculty and administrators were listed in Yale's Form 990, which was filed with the Internal Revenue Service in 2012.*
