When freed 1,001 Invention Projects on a CD and my web page

10-12-14 Mandy Miles Sunday Citizen Key West she wants...
PO is not about mail if it was iMail would be given to Apple
with \$1 Trillion to convert the USPS to iMail.

10-12-14 PO should be given to Apple for iMail, Mandy can
start writing this article tonight... grin!!

10-12-14 Mandy Miles Sunday Citizen Key West she wants... to
get one, like iMail given to Apple by the 1984 II Numb Nuts
Dictators... grin!!

10-12-14 Mandy Miles Sunday Citizen Key West she wants...
Homeland Security to stop the murders by scanning the
Home... Who gave Homeland Security the name but not the
"1984 II" Big Brother Orders to scan for this?

"School officials release names of 2 child victims in New York
quadruple killing" Fox News GUILDERLAND, N.Y. - Two young
brothers found slain with their parents last week in a
suburban Albany home are being described by their
principal as "kind, gentle and joyful" boys.

When freed 1,001 Invention Projects on a CD and my web page

10-12-14 Mandy Miles Sunday Citizen Key West "Why in the World are 49-cent postage stamps still a part of our lives? Same reason gasoline cars are Mandy, our 1984 II Numb Nuts Dictators! "No wonder the PO is hemorrhaging cash... Mandy knows but is prohibited from writing the cash comes from \$777 Trillion in Gas Station Hold Up by Yale Grads + Vets like McCain \$\$\$ "Their blaming technology instead of embracing it... Mandy, they gave the laser guided car to the Navy Fighter Jets, yes laser guided scooter in Key West since forever, was kill so others would get killed. McCain and the Yale Grads know they have killed a lot of people suppressing laser guided cars, trucks, bikes! Hell No you can not use Homeland Security to scan for Breast Cancer or the flu... McCain killed off or paid off all the Yale MD's when Teddy Kennedy was still alive. Mandy, she wants... the post office to scan your mail... no more stamps. Post Office takes a picture of your mail, Mandy missed this! Mandy went on and on about the Post Office. Nothing about over paying PO workers at double what Mandy makes and managers at all PO get \$100K. Nothing to do with the PO everything to do with the Electric Windmill? Car and Homeland Security not scanning for 10 mm breast tumors. MD's get \$1 Trillion a year in kick backs for going along with the gasoline... fire bombing cop cars via Bush, its poisonous exhaust. Remember cold-hearted MD's who own Nursing Homes let you fall asleep on the toilet as a seat belt would be harming your rights! Sick MD's!

When freed 1,001 Invention Projects on a CD and my web page

10-12-14 Mandy Miles Sunday Citizen Key West she wants... PO to scan mail with no more stamps even if it cost more.

10-12-14 Back from China, (Mandy) comes down with a lung disease... Pollution in China hits 20 times safe limit. A thick haze of smog has descended on parts of northern

China, pushing pollution to more than 20 times what the World Health Organization considers a safe limit. The heavy smog reduced visibility in some areas to such an extent Friday that highways were closed and residents were warned to stay indoors.

10-12-14 Back from Glasgow, (Mandy) comes down with a lung disease... Pollution in Glasgow causes 300 premature deaths per year. The city council report reveals air pollution as the cause of 300 premature deaths in the city each year. That means pollution in Glasgow is now 15 times deadlier than violent crime.

10-12-14 Vietnam War's North Vietnam Generals scrap the masses for a BP Oil Swiss Bank Account. This will cause a civil War when Leaked by Greg Lovestars... Scrap metal from used ships polluting Vietnam environment. The Vietnamese Ministry of Natural Resources and the Environment allows enterprises and individuals to import used ships for scrap steel. Environmentalists say it's causing pollution. Vietnam Net 1 Trillionth Electric Windmill Ford Escorts coming off the Hanoi Assembly Lines... North Vietnam Generals could not pass up \$777 Trillion in a Swiss Bank Account... sick! Greed is the #1 reason why the Navy sank the JFK Super Shuttle Trains! And the PO doesn't have laser guided mail.

10-12-14 Sunday Washington Times, "Exclusive: Feds take jobs from disabled Americans, send them to Central"... Jim McElhatton and Jim McElhatton, Quin Hillyer

10-12-14 m McElhatton and Jim McElhatton, Quin Hillyer know about the 1 Trillionth Electric Windmill Ford Escorts coming off the Hanoi Assembly Lines. Washington Times owner and editors know too! Sick!

When freed 1,001 Invention Projects on a CD and my web page

10-12-14 Norway foreign minister: \$5.4B pledged for Gaza. U.S. Secretary of State John Kerry shakes hands with Qatari Foreign Minister Khalid bin Mohammad Al-Attiyah in Cairo,

Egypt, Sunday, Oct. 12, 2014, during the Gaza Donor Conference. Yale Gaza Medical School pledged for Gaza. Built on a Eiffel Tower Structure of course... and Elite Medical MD will come out of this Eiffel Tower.

10-12-14 I would call this Edison research the iWife... as his wife inspired 1K inventions looking into her eyes. I hope these invention research Doctors look at the iWife first! The Undiscovered World of Thomas Edison

When freed 1,001 Invention Projects on a CD and my web page

*Historians, sorting through a treasure trove of Edison's papers, are discovering revealing details that enrich our portrait of one of America's most accomplished inventors
Kathleen McAuliffe*

When freed 1,001 Invention Projects on a CD and my web page

When an associate asked Thomas Alva Edison about the secret to his talent for invention, the plainspoken Edison retorted, "Genius is hard work, stick-to-itiveness, and common sense."

http://www.theatlantic.com/magazine/archive/1995/12/the-undiscovered-world-of-thomas-edison/305880/?google_editors_picks=true

When freed 1,001 Invention Projects on a CD and my web page

*"There's still more!" his colleague said imploringly.
"Although [the rest of us] know quite a lot . . . and worked hard, we couldn't invent . . . as you did."*

When freed 1,001 Invention Projects on a CD and my web page

What Edison never seemed to grasp was that his "common sense" was exceedingly uncommon- freakish, really. More

patents were issued to him than have been issued to any other single person in U.S. history: 1,093. But Edison's towering status reflects more than his extraordinary productivity. He created things that transformed our world-- among them the phonograph, the motion-picture camera, and the incandescent light bulb. And he made substantial contributions to numerous technologies, including telegraphy, telephone communications, and several business procedures.

When freed 1,001 Invention Projects on a CD and my web page

Yet, in the six decades since the inventor's death, little serious writing has been done about Edison's remarkable genius for invention. In the words of the historian Keith Nier, "He is actually one of the least well known of all famous people, and much of what everybody thinks they know about him is no more reliable than a fairy tale."

When freed 1,001 Invention Projects on a CD and my web page

Nier is one of eight historians at Rutgers University and at the Edison National Historic Site, in West Orange, New Jersey, who are now trying to set the record straight. The team, headed by Robert Rosenberg, is in the process of editing and publishing selected documents from the inventor's life's work. The scale of their endeavor is virtually unprecedented in the history of technology and science. What is now known as the Edison Papers Project started in 1978, when archivists estimated that the inventor's estate included just over a million pages of documents. Having been told that the contents had been "loosely organized" by previous archivists, the Edison Papers staff expected to have chosen the documents for a highly selective microfilm edition within a decade, after which a still more selective book edition would be completed.

When freed 1,001 Invention Projects on a CD and my web page

Alas, organization, like beauty, turns out to be in the eye of the beholder. "It was a big mess," recalls the associate director of the project, Thomas Jeffrey, remembering his dismay at seeing for the first time the documents housed at the extensive industrial complex that makes up the Edison National Historic Site. Dusty stacks of papers--many seemingly untouched since Edison's death--sprouted as haphazardly as weeds across the space. Jeffrey, who had been hired to make the initial selection for the microfilm edition, instead found himself leading a scouting expedition. "We went from building to building, room to room, drawer to drawer," he recalls. "It took us more than a year just to get to the end of the paper trail, and when we added up the numbers in our inventory, we were shocked."

When freed 1,001 Invention Projects on a CD and my web page

The collection turned out to include at least four million pages, and quite possibly as many as five million. According to Jeffrey's most recent estimate, publishing a representative sample of the inventor's work in both a microfilm edition and a printed edition of fifteen to twenty volumes could take until 2015. (To date the team has published more than 250,000 pages of documents on microfilm and three enormous printed volumes, and has begun preparing for electronic publication.)

When freed 1,001 Invention Projects on a CD and my web page

Now, seventeen years into the project, the historians have become so intimately acquainted with their subject that, as Rosenberg half guiltily admits, "we've become spies inside his mind." All are acutely aware of their unique privilege. In many instances they are the first people since the inventor's death to gaze on laboratory records, early drafts of patent applications, letters, photos of models, and other telling memorabilia.

When freed 1,001 Invention Projects on a CD and my web page

Luckily for posterity, the process by which Edison invented is documented in exquisite detail in a series of 3,500 notebooks. The researchers unabashedly compare his fecundity of ideas to Leonardo da Vinci's. The notebooks are filled with fascinating observations and insights--many pertaining to unrelated projects, in a seeming free flow of associations. Consecutive sketches--some rough and crude, others executed with the exactitude of a draftsman--traverse a vast spectrum of technologies.
