(Berkeley Lab), researchers have developed a broadband imaging technique that looks inside this realm with unprecedented sensitivity and range. By combining atomic force microscopy with infrared synchrotron light, inventors have improved the spatial resolution of infrared spectroscopy by orders of magnitude, while simultaneously covering its full spectroscopic range, enabling the investigation of variety of nanoscale, mesoscale, and surface phenomena that were previously difficult to study.

Kidnappings of foreign nationals and attacks against Nigerian police forces in Lagos State and the Niger Delta region continue to affect personal security for those traveling in these areas. Criminals or militants have abducted foreign nationals, including U.S. citizens, from off-shore and land-based oil facilities and maritime vessels, residential compounds, and public roadways. Ansaru, an offshoot of Boko Haram, has specifically targeted foreigners in the north for kidnap in the past few years with lethal outcomes. Violent crimes occur throughout the country. U.S. citizen visitors and residents have experienced armed muggings, assaults, burglaries, armed robberies, car-jackings, rapes, kidnappings, and extortion. Home invasions also remain a serious threat, with armed robbers accessing even guarded compounds by scaling perimeter walls, accessing waterfront compounds by boat, following residents or visitors, or subduing guards to gain entry to homes or
