7-24-14 Greg's Serendipity... I put some 2" clear packing tape
on Moms (91 yrs old 100 if I marry 4 MD women grin) letter
and the first inch was rolled over so the end of the tape
would not disappear into the roll of tape so stuck it to the
bike tire then though Ha! Duct Tape for Bike Tires, iApp
Assortment for thorns, ice, sand, slippery gravel... etc and
from 1/2" thick to 1 inch thick with all types of treads and
you could even put some heating wire into the tread of Duct
Tape. lights can be imbedded into the Duct Tape for Tires.

7-24-14 Greg's Serendipity... Discovering the Rx Overnight
Penicillin Miracle Cure For Breast Cancer, I will write this up
at the top of my web page someday soon! Influenced by the
transmission of nerve signals into the hippocampus, an area
of the brain that plays InventSomething Cheers from 4 MD
Wives!

7-24-14 Greg's Serendipity... for right now I must influence
women... To Target the brain to treat obesity because Obesity
cells turn into breast cancer by the trillions, think 777
Trillion Obese breast cancer cells.

7-24-14 Greg's Serendipity... "let light be made"

7-24-14 Greg's Serendipity... "let light be made" iApps to Discover how light was made!

7-24-14 Greg's Serendipity... "let light be made"

7-24-14 Greg's Serendipity... Photons are the particles of light.

7-24-14 Greg's Serendipity... "Let there be light"

7-24-14 Greg's Serendipity... God let there be light, and there was light

7-24-14 Greg's Serendipity... Discovering the Rx Overnight Penicillin Miracle Cure For Breast Cancer, I will write this up at the top of my web page someday soon!

7-24-14 Greg's Serendipity... Greg quotes Dr. Nancy... if it works put it in the water, invent a way to put it in the water with an iApp. HPV vaccination rates in the US are still 'unacceptably low,' says CDC

7-24-14 Greg's R&D Serendipity... with \$777 Trillion for R&D!! Apple has spent \$4.36 billion on R&D over the first 9 months of Apple's fiscal year 2014. That's an increase of 32 percent over the same nine-month span of fiscal 2013.

7-24-14 Greg's Serendipity... iPhone7's built into your iPad, MacBook Air, Macbook Pro Mac! And 777 Trillion Satellites reinvented then rocketed into low Earth Orbit so you can connect to Apple HQ anywhere on Earth!

When freed 1,001 Invention Projects on a CD and my web page

Sheesh, draw attention the Yale Key West Medical School should be built today on an Eiffel Tower Structure! 3-30-14 as Greg flew into Key West with \$777 Trillion to build a Yale Key West Medical School on 3-4-2011.

Sheesh, draw attention the Yale Key West Medical School built on an Eiffel Tower Structure should be built today 7-24-14. Greg flew into Key West with \$777 Trillion to build a Yale Key West Medical School on 3-4-2011.

Boston Scientific Serendipity... needs some iApps!

Boston Scientific Serendipity... has announced it's releasing the POLARIS Imaging System, a device used with the company's intravascular ultrasound (IVUS) catheters. It's designed for use with the company's existing coronary, peripheral, and intra-cardiac catheters, as well as upcoming fractional flow reserve (FFR) wire and new IVUS catheters that Boston Sci expects to release soon.

Boston Scientific Serendipity... needs some iApps! What else

can they do with their ultrasound POLARIS Imaging System?

7-24-14 Greg's Serendipity... An Air Algerie flight with 110 passengers onboard, nearly half of them French citizens, crashed on Thursday after the jet disappeared over northern Mali en route from Burkina Faso to Algiers, an Algerian official said.

7-24-14 Greg's Serendipity... nearly half of them French citizens 55 Oil Workers not working on a cure for Cancer, there are 777 Trillion French Citizens working in Africa Oil Fields. Not working on a Cure for Cancer - A End to poison gasoline exhaust Holocaust II... Jews join the French Foreign Legion for the \$777 Trillion in oil revenues. Greg needs a Serendipity... to kick the French + Jews out of Africa!

7-24-14 Greg's Serendipity... 15 die in shelling of UN shelter in Gaza; Israel says warning issued Los Angeles Times 8 minutes ago Written by Alexandra Zavis Eight-year-old Mahasen Mohammed El Shenbary screams in pain from a shrapnel wound in her arm at Jabalia hospital. She was one of more than 100 people injured when a U.N.

7-24-14 Greg's Serendipity... Jews are using Mecca's Godsent Oil money to finance their war in Gaza \$\$\$

7-24-14 Greg's Serendipity... Pentagon gave Mecca this Oil \$\$\$ Godsend.

When freed 1,001 Invention Projects on a CD and my web page

7-24-14 Greg's Serendipity... Newton in his treatment of birefringence and, more generally, of the splitting of light beams at interfaces into a transmitted beam and a reflected beam. Newton hypothesized that hidden variables in the light particle determined which path it would follow

7-24-14 Greg's Serendipity... hidden variables in the light particle determined which path it would follow

7-24-14 Greg's Serendipity... Properties of photons: Photons always move with the speed of light. Photons are electrically neutral. Photons have no mass, but they have energy $E = hf = hc/\lambda$. Here $h = 6.626 \times 10^{-34} \text{ Js}$ is a universal constant called Planck's constant. The energy of each photon is inversely proportional to the wavelength of the associated EM wave. The shorter the wavelength, the more energetic is the photon, the longer the wavelength, the less energetic is the photon. A

laser beam and a microwave beam can carry the same amount of energy. In this case the laser beam contains a smaller number of photons, but each photon in the laser beam has a higher energy than the photons in the microwave beam.

7-24-14 Greg's Serendipity... microwave beam

7-24-14 Greg's Serendipity... Photons can be created and destroyed. When a source emits EM waves, photons are created. When photons encounter matter, they may be absorbed and transfer their energy to the atoms and molecules. Creation and destruction of photons must conserve energy and momentum. The magnitude of the momentum of a photon is $p = hf/c = h/\lambda$.

7-24-14 Greg's Serendipity... Synchrotron light sources are widely used in materials science, protein crystallography and biomicroscopy applications. They provide a unique stable source of high intensity photons, extending over a broad energy range from the far infrared to the γ -ray region. However, they have also proven invaluable for carrying out detailed metrology of radiation detectors by making available highly collimated and controllable monochromatized beams of synchrotron radiation. Light sources are only accessible at synchrotron research facilities and a number of specialized laboratories (for example, the Physikalisch-Technische Bundesanstalt (PTB), radiometry laboratories in Berlin, Germany) have been established specifically to be carry out photon metrology from the UV to the X-ray wavelengths using primary source standards in conjunction with primary detector standards. In this review, we discuss the use of synchrotron radiation for characterizing and calibrating X- and gamma-ray radiation detectors.

7-24-14 Greg's Serendipity...

7-24-14 Greg's Serendipity... Sierra Leone's chief Ebola doctor contracts the virus, The head doctor fighting an outbreak of the deadly Ebola virus in Sierra Leone has himself been infected.

7-24-14 Greg's Serendipity... NASA Expertise to manufacture "MD + Hospital Space Suits" is best done by "Rocket Scientists."

7-23-14 Expertise to manufacture 1 Trillion cans of H₂ @ -254 C without any going off... is best done and only done by "Rocket Scientists."

7-24-14 Greg's Serendipity decade ago was keep all lightning cloud to cloud and the NY Times had hear this on my web 777 Trillion Times... 2 Killed as Storm Rips Through Virginia Campground New York Times

7-24-14 Greg's Serendipity... Greg quotes Dr. Nancy... if it works put it in the water, invent a way to put it in the water with an iApp. HPV vaccination rates in the US are still 'unacceptably low,' says CDC

iApps for Yale Key West Med Students! iApp will reinvent the
morcellator is a surgical instrument.

Welcome, IBM. Seriously.

New class of business apps,
MD apps, Inventor apps
Edison would know AC wins

Welcome to the most exciting and important marketplace since the computer revolution began 35 years ago.

And congratulations on your first personal computer.

Putting real computer power in the hands of the individual is already improving the way people work, think, learn, communicate and spend their leisure hours.

Computer literacy is fast becoming as fundamental a skill as reading or writing.

When we invented the first personal computer system, we estimated that over 140,000,000 people worldwide could justify the purchase of one, if only they understood its benefits.

Next year alone, we project that well over 1,000,000 will come to that understanding. Over the next decade, the growth of the personal computer will continue in logarithmic leaps.

We look forward to responsible competition in the massive effort to distribute this American technology to the world.

And we appreciate the magnitude of your commitment.

Because what we are doing is increasing social capital by enhancing individual productivity.

Welcome to the task.

iApps for Yale Key West Med Students! Elite MD's Teaching without getting a Apple Paten on the Rx Overnight Miracle Cures! A morcellator is a surgical instrument used for division ("morcellation") and removal of large masses of tissues during laparoscopic surgery. [1] It can consist of a hollow cylinder that penetrates the abdominal wall, ending with sharp edges[1] or cutting jaws, through which a grasper can be inserted to pull the mass into the cylinder to cut out an extractable piece.

7-23-14 New York Times-by Pam Belluck wrote... fuels calls to limit or eliminate the procedure. WHY did Pam leave out reinvent the morcellator so it will not sliced into tumors... more common than many experts had previously thought, a conclusion that is likely to fuel calls to limit or eliminate the procedure. When the morcellator sliced into tumors they and their doctors did not know existed (Why?) and spread cancer cells through the abdomen. this fuels calls to limit or eliminate the procedure, New York Times-by Pam Belluck didn't write No One fuels the call to reinvent the morcellator to "Observe" the undiagnosed tumors! Wow... would some MD rewrite this for the NY Times?

7-23-14 New York Times

From

7-23-14 Anti-Tank Heat-Seeking Missile Detector Used to Spot Early Malaria in Single Red Blood Cells

7-23-14 Anti-Tank Heat-Seeking Missile Detector Used to Spot Early Malaria in Single Red Blood Cells, the synchrotron light source and detectors used in the experiment, to Spot Early Malaria in Single Red Blood Cells cost \$777 Trillion and take MIT people off "War Toys."

When freed 1,001 Invention Projects on a CD and my web page

7-23-14 The Javelin anti-tank missile system is a killer weapon that seeks out and destroys armored vehicles, but it has now been successfully used to hone in on the malaria parasite. The system uses a Focal Plane Array (FPA), a heat seeking Fourier Transform Infrared (FTIR) spectroscopy detector that was specifically developed to target tanks. By combining this device with a synchrotron light source and an infrared microscope, Australian researchers from Monash University and University of Melbourne have been able to spot malaria in a single red blood cell even during the parasite's early stages of development.

7-23-14 The test looks for light signatures of lipids that are correlated to the different stages of malaria present within a cell. The test takes only four minutes to perform and doesn't

require a specialist to interpret the results, but don't expect to see repurposed Javelins in your clinic any time soon: the synchrotron light source and detectors used in the experiment are not cheap.

7-22-14 800th Fiery Cop Car Crash and Anne Barnard at the NY Times writes... "Questions About Tactics and Targets as Civilian Toll Climbs in Israeli..."
