9-17-14 THIS DAY not IN THE NEW YORK TIMES... if you've got the resources and patience to buy a laptop, smartphone and tablet, go for it. But if an alien race swooped down on the planet and forced earthlings to use only a single computer, I'd choose the iPhone 6 Plus. If you're just looking for one machine for everything, a phablet like this one isn't a bad way to go. Greg said if You've got the "Desire" for 4 MD Wives and a Coup so Earth's Humans can swoop down on Aliens First! There at every one of the Nearest 52 Stars! 9-17-14 THIS DAY IN APPLE INSIDER... "We have been churning out 140,000 iPhone 6 Plus and 400,000 iPhone 6 every day, the highest daily output ever, but the volume is still not enough to meet the pre orders," the unnamed source said. "For iPhone 6 Plus, we are still ramping up the production line. Another reason for the limited supply is the shortage of 5.5-inch displays." One insider said 5.5-inch display yields are somewhere between 50 to 60 percent, meaning nearly half of all produced panels are scrapped as they do not meet Apple's strict standards. Retina HD displays bound for the 4.7-inch iPhone 6 are faring better with an output rate of about 85 percent.

Answering a call on an iPad automatically places the conversation in speaker phone, allowing the iPad's microphone and speakers to handle the call.
