9-25-14 Madonna + Medical Lyrics...

9-25-14 Madonna + Medical Lyrics... EEG Mask for Madonna  
on stage with Giant Screen of her Brain!  
Electroencephalography (EEG) is a well known way of  
assessing brain function, but because of the great difficulty  
of applying electrodes to the scalp it is rarely used in clinical  
practice. In emergency medicine, in particular, being able  
to evaluate how the brain is doing following a trauma can  
help prevent a lot of long term neurological damage. To  
make EEG more practical in such situations, researchers from  
University of Eastern Finland have developed and tested a

*new EEG electrode face mask that is easy to put on and can provide fast charting of brain activity. The mask consists of a flexible polyester film onto which silver ink was applied through screen printing. The 16 hydrogel-coated electrodes make direct contact with the mostly hair-free parts of the face and do not need any additional gel to achieve good contact. The ingredients make the mask MRI and CT compatible, allowing the patient to be quickly moved between different modalities while the brain waves are being monitored. The face mask is disposable and can be used in emergency rooms and maybe even on football field sidelines. Madonna Concert Giant Screens!*
