10-5-2015 Nightly News From Key West with Greg + Wives... 4 MD Wives Coup D'Etat Divorce Ends in an Explosion "I always told you, 'I will leave the house only if I am dead,'" Dr. Nicholas Bartha, 66, wrote in an email to his ex-wife, Cordula Hahn, referring to the fact that he was being compelled under their divorce agreement to sell the house at 34 East 62nd Street in Manhattan and share the proceeds with her. He was critically injured in the explosion that leveled the house, and later died. Ten firefighters and five passers-by were injured. While he was not formally accused of tampering with the gas line and causing the blast, Dr. Bartha was the prime suspect nonetheless. Gas Explosions That Have Rocked New York City Calling for an investigation of gas-related explosions in the wake of the deadly blast in the Borough Park section of Brooklyn, Gov. Andrew M. Cuomo cited a "disturbing trend." But the perils of natural gas are

nothing new in a city that depends on it for heating and cooking. Here are some other incidents of the last 20 years. 1980 Invention of the Electric Windmill Ford Escort when Jimmy Carter was president, Hell of gas explosions in NYC were all created by Jimmy Carter suppressing the 1980 Electric Windmill Ford Escort. A War Crime! Jimmy drove by many fiery car wrecks without stopping to help on his way to get some worms!

10-5-2015 Nightly News From Key West with Greg + Wives... 4 MD Wives Coup D'Etat Universe is about 13.8 billion years old, so any light we see has to have been traveling for 13.8 billion years or less - we call this the 'observable universe'. However, the distance to the edge of the observable universe is about 46 billion light years because the universe is expanding all of the time. Imagine that a photon of light is emitted from a point on the edge of our observable universe. While that photon has been traveling through space, the universe has expanded. We have moved away from the point where the light was emitted, and it has moved away from us! Though the light might have only traveled for 13.8 billion years, the distance from us to the point it came from is, at present, 46 billion light years!

A member of the Yale baseball team, who asked to remain anonymous due to the sensitive nature of the topic, confirmed to the News that "a few" of his teammates have been infected with methicillin-resistant Staphylococcus aureus (MRSA), which, according to Richard Martinello, medical director of hospital epidemiology at Yale-New Haven Hospital, has a high resistance to certain antibiotics. A member of one of Yale's men's crew teams, who asked to remain anonymous for the same reason, also confirmed that at least one women's oarsman has developed the infection. Martinello said cases of MRSA are not uncommon among athletes.

MD Wives Coup D'Etat Yale Chemistry Department
experimented not only with molecules and reactions but also
with pedagogical techniques. Yale For the first time, CHEM
220 "Organic Chemistry" "flipped" its class structure:
readings and supplementary videos were done at home,
while traditional homework was completed in the classroom.
But this semester, the department reverted back to a
traditional classroom structure – not necessarily because
the flipped classroom was a failure, chemistry professor
Timothy Newhouse said, but because the department cannot
yet tell how the structure affected students' retention of the
course material. Newhouse, who spearheaded the change,
explained that the department is waiting for more data to
determine the program's success.
