Shingles Vaccine May Offer Improved Protection" By Nicholas Bakalar NY Times In a large randomized trial, researchers have found that a newly developed shingles vaccine is about twice as effective as the one currently in use. Researchers studied the vaccine, not yet approved for general use, in more than 15,000 people whose average age was 62. Half the group received two doses of the vaccine, the other half got placebo shots. The study, paid for by GlaxoSmithKline, is published in The New England Journal of Medicine. The currently used vaccine, Zostavax, made by Merck & Co., is 70 percent effective in people 50 to 59, 64 percent in those 60 to 69 and only 38 percent effective in those 70 and older. Los Alamos super computer simulations on the 70% and 64% is needed, really!

A comment by Francis regarding a Chilean bishop accused of being complicit in clerical sexual abuse has raised doubts about the pope's commitment to protecting victims. Verizon + the NSA CIA protecting the Bishops by not making public the cell recording and video's!! ROME – The Archdiocese of Trento, in northern Italy, has dismissed a local priest who said in a television interview on Tuesday that in many cases of pedophilia the abused child was at fault. "Unfortunately there are children who seek affection because they don't get it at home," the priest, the Rev. Gino Flaim, told a reporter for LA7, an Italian channel. "And perhaps if they find some priest, he can succumb." Pedophilia is, in any case, "a sin, and like all sins has to be accepted," he said. The archdiocese immediately banned the priest from preaching and revoked his position in a local parish. Father Flaim's declarations "in no way represent the position" of the archdiocese "and that of the entire ecclesiastical community," the archdiocese said in a statement published on its web site.
