Gliomas represent approximately 30% of all central nervous system brain tumors¹. To understand the molecular mechanisms underlying low-grade gliomas with mutations in *IDH1* (encoding isocitrate dehydrogenase 1), we analyzed paired tumor samples from 41 patients, comparing higher-grade, lower-grade counterparts. Integrated genomic analyses, including copy number, gene expression and DNA methylation profiling, demonstrated expansion of the original tumors and identified oncogenic pathways. Our results include activation of the MYC and RTK-RAS-PI3K pathways and E2F2-mediated cell cycle transitions, as well as epigenetic silencing of transcription factor genes bound by Polycomb repressive complex 2 in tumor cells. Our results not only provide mechanistic insight into the genetic drivers driving glioma progression but also identify inhibition of the bromodomain protein family as a potential therapeutic approach.

12-8-2015 PARIS – La Belle Équipe, team... Los Alamos and Brain Cancer - not in this Yale Study - Gilead Sciences and researchers in Germany, Yale researchers identified what causes gliomas, or premalignant tumors, to transform into glioblastomas, which are malignant tumors. The team also identified a potential therapy to the lethal cancer. The study, which first began in 2013, was published in Nature Genetics on Nov. 30. “We unbiasedly characterized the genetics of how premalignant gliomas become malignant and we identified in our laboratory a therapeutic approach,” said doctoral student Hanwen Bai GRD '17. The study focused on 41 patients who had premalignant tumors which, within 10 years, transformed into malignant ones, Bai explained. The genetics of both tumors were compared, and as a result, the researchers could directly understand the causes of malignancy. Four aspects were studied: gene mutation, large DNA fragment abnormality, gene expression and epigenetic changes – when external factors influence gene expression, in particular how DNA methylation of the tumor cells affected its progression. The study concluded that the four aspects contribute individually, but also “synergistically,” to cause the premalignant tumors to become malignant, and identified BET inhibitor – an anticancer drug – as a potential therapy for the cancer. This was not the first study which attempted to analyze the cause of malignancy in gliomas, but it was the first to

succeed in its purpose. According to Bai, the Yale researchers' work was able to build upon previous studies for two reasons, the first of which was the result of the sampling method. "A lot of previous studies... have collected malignant and premalignant tumors from different patients, therefore they are comparing malignant tumors from patient A with premalignant tumors from patient B, and trying to understand the mechanisms underlying them," Bai said. "Therefore that's a very noisy comparison because different people have different genetic and epigenetic backgrounds so you're kind of comparing apples and oranges." The Yale study avoided that mistake by analyzing 41 sets of tumors where the malignant and premalignant tumors were from the same patient. The new study was also able to improve the depth and range of analysis in comparison to past studies, said Bai. "A lot of previous studies, if and when they are indeed comparing tumors from the same individual, only look at one aspect of why the malignant transformation happened." Bai said. "Whereas in our paper, for the first time, we comprehensively examined all four major aspects that could contribute to malignant transformation."

Alexander Vortmeyer, professor of pathology and director of the neuropathology program at the Yale School of Medicine, explained that this advancement is especially important because of the deadliness of glioblastomas. "Glioblastomas, you can say, are a total disaster," Vortmeyer said. "It is not as frequent as, let's say, lung cancer or colon cancer or breast cancer, but it's not a rare disease. When you are hit with this diagnosis it is always a tragedy, because essentially there is almost nothing that can be done... The prognosis is about a year that you have to live." Furthermore, the current options for therapy provide very little in the way of extended lifespan. Vortmeyer noted that, in cases of glioblastomas, a patient will only get a couple of additional weeks to live with

therapy. According to Vortmeyer, there have been few if any advancements in the treatment of glioblastomas.

12-7-2015 Construction of the Yale Paris Medical School on a titanium Eiffel Tower Structure has not even started yet - yet Greg flew into Key West on 3-4-2011 with \$777 Trillion dollars confiscated from Saudi Arabia from gas station hold ups in the USA.

12-7-2015 Construction of the NASA Super Shuttle Coal Trail Hubble Space Telescope's of 100's of Cars has not begun...

12-7-2015 Construction of the Ultra Apple-Starbucks Store School University has begun in some Los Alamos Super Computer Simulation... 1984 II dictators can't watch everyone all the time, ha. Apple is using all of its worldwide network of stores as temporary classrooms this week to teach coding. The technology firm is using its 480 stores as bases for tutorials in the annual "Hour of Code" project. 1984 III Apple-Starbucks Dictatorship Begins with 007 Code Top Secrets and Rx Recipes not cookie recipes for girls as 1984 II Dictators Policy!

Apple's new store in Chengdu in China. All the shops are running coding

12-7-2015 Adrian Smith and Gorgon Gill Architecture, the firm behind the tower's design, said the building will also overlook the Red Sea. The Jeddah Tower will measure 3,280 feet when it's completed in 2018. It'll be the tallest tower in the world and dwarf the current record holder, Dubai's Burj Khalifa. The Jeddah Tower will measure 3,280 feet when it's completed in 2018. It'll be the tallest tower in the world and

dwarf the current record holder, Dubai's Burj Khalifa. Other towers with height records include the Shanghai Tower in China, which is currently the second tallest in the world at 2,073 feet tall; and the tallest in the U.S., 1 World Trade Center (aka Freedom Tower) in New York City, which measures 1,792 feet at its spire. Iraq is also planning to build a tower to shatter the Jeddah Tower's record. "The Bride" will reportedly reach 3,780 feet into the sky and it'll be erected in Iraq's Basra Province by 2025. Another building in New York might also get the "tallest residential building in the world" title when the Nordstorm Tower is completed in 2018. The building will rise to 1,775 feet at its spire, making it just a foot shorter than the Freedom Tower. Currently, 432 Park Ave. has the title at 1,396 feet tall, followed by Dubai's Princess Tower at 1,356 feet high.

Sheesh, draw attention the Yale Key West Medical School should be built today on an Eiffel Tower Structure! 3-30-14 as Greg flew into Key West with \$777 Trillion to build a Yale Key West Medical School on 3-4-2011.

12-7-2015 PARIS — La Belle Équipe; Laser Guidance on your GE Toaster Oven - G.E.'s appliance division dates to the company's early days and is the most direct connection that most consumers have with the American conglomerate. It introduced its first electric toaster in 1905 and the first electric range, the Hotpoint, in 1910. Its first electric washing machine for homes was introduced in 1930. But the unit has been dwarfed by other G.E. businesses in recent years, particularly its finance operations. Appliances and lighting accounted for only about 5 percent of G.E.'s \$148.6 billion in revenue in 2014. "The appliances business is performing well and G.E. will continue to run the business while it pursues a sale," General Electric said on Monday.

12-7-2015 GE has stifled the "Laser Guidance on the 2015 Ford Escort, Electric Windmill one and on the GE Toaster
