9-27-2019 Meryl Streep in "The Laundromat," about the deep corruption documented in the data leak known as the Panama Papers. After opening in movie theaters this week, it can be streamed on Netflix starting Oct. 18. Leak of the 2019 Ford WindmillCAR as Meryl Streep was filming in Key West as Greg biked by her... Windmillcars not in the movie the consequences are borne by ordinary people, here embodied by Meryl Streep with a plain haircut and a flat Midwestern accent. She plays Ellen Martin, a Michigan grandmother whose attempts to do apparently straightforward things like settle an insurance claim and buy a new condo are ensnared in complicated schemes that defy rational comprehension. The companies she deals with are shells within shells, paper entities connected in the Mossack Fonseca offices, where accountability is laundered along with money.

9-27-2019 Who will play Meryl Streep in the Key West WindmillCAR Movie? Meryl Streep in the opening Scene on Duval walks into a spray painted black cloud of diesel from a Navy guys truck. In real life Meryl Streep did smell the diesel from many, many Navy guys trucks driving by Ricks, a block from filming Laundromat. But for a movie about how awful the world is and how it got that way, "The Laundromat" censored out Meryl's comment about smelling so much diesel and so many double cab long bed diesel trucks on Duval, on my God another truck!

9-27-2019 Oil-Gods; oligarch cheats on his wife with their daughter's best friend. The wife of a high-ranking Chinese official poisons a British businessman. Corruption is so normal that decency seems outlandish. Soderbergh and his top-notch cast (Sharon Stone shows up, as do Jeffrey Wright and Matthias Schoenaerts) keep things lively, playing out parables of betrayal and deception with pulpy, TV-movie flair. Rather than trying to elicit horror or pity, "The Laundromat" aims

to provoke a sense of spirited outrage, the sort of righteous disgust that might express itself through reform-minded citizen action. There's no reason to be cynical about that. The main question about a movie like this is whether it can awaken viewers who... smell Diesel trucks in Key West on Duval.

9-27-2019 \$500 million dollar IBM Summit super computer simulations; bacteria on ants and Escovopsis, pitting the organisms against one another in Petri dishes inside a super computer for the summit results. Antimicrobials that kill Escovopsis. The main classes of antimicrobial agents are disinfectants "nonselective antimicrobials" such as bleach. IBM Summit super computer simulations; use of bleach in the hospital and patients. Bleach!! Bleaches work by reacting with many colored organic compounds, such as natural pigments, and turning them into colorless ones. While most bleaches are oxidizing agents (chemicals that can remove electrons from other molecules), some are reducing agents (that donate electrons). Chlorine, a powerful oxidizer, is the active agent in many household bleaches. Since pure chlorine is a toxic corrosive gas, used in Wars today. ...control bacteria, viruses, and algae and in many places where sterile conditions are required... 1 Click Amazon links to extremely versatile disinfectants... with specs and genius tutors.

9-27-2019 I sought to learn more about the tumor test and exactly what my score signified. **9-27-2019 CIA lets \$777 Trillion remain in the hands of Prince Salman today, today he is spreading cancer with these trillions of dollars killing American Women with Breast cancers. CIA!!**

**9-27-2019 I will never be 100 percent confident about my decision.**

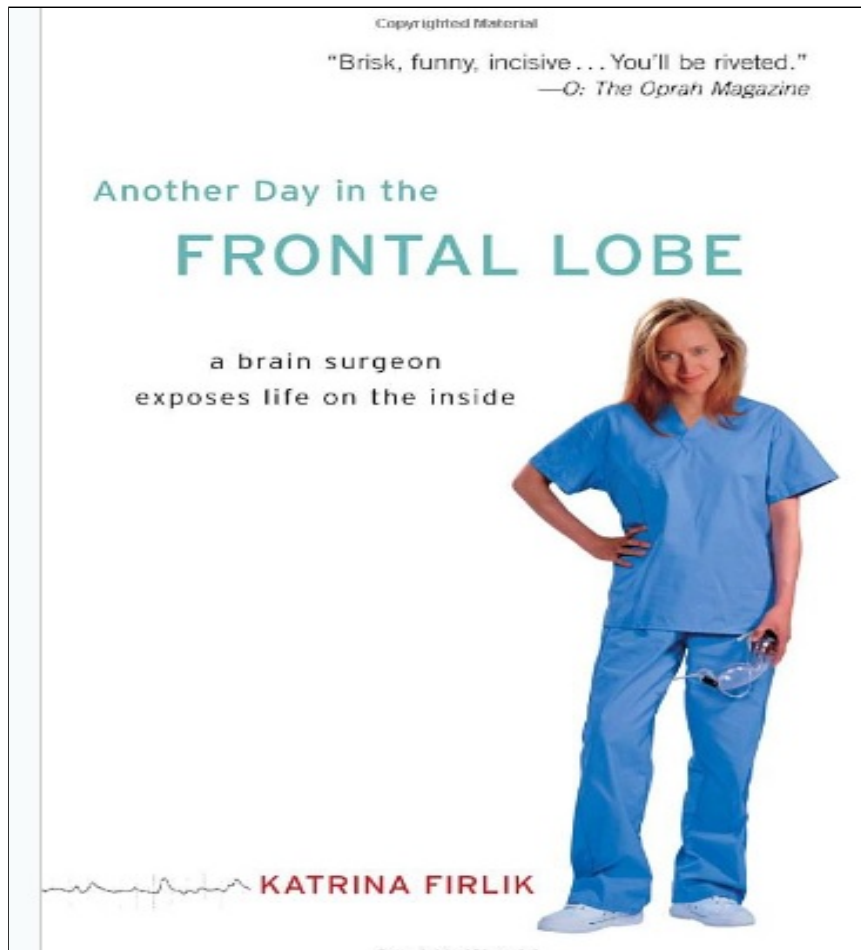

**But I have faith that forgoing chemo doesn't mean I don't care about seeing my kids graduate from college or start their own families one day. It could be the reason I'm able to do those things. Virus only needs one Cornell Medical School housed at a Freedom Tower to kill every virus on cats, dogs, and humans. Oil MD had been working all this time on Oil Money Virus. "It was thought that it jumped from cats to dogs in the late seventies, causing a pandemic. However, with more work, our collaborators discovered that it's more complicated than that. Likely, it jumped from cats to raccoons to dogs. In Key West a Cornell MD would tell us about the KW chickens and the virus jumping to... "...The work would likely not have been possible without the cryo-electron microscope at Penn State, said Hafenstein. The device, which uses ultra-cold temperatures to create high-resolution images that are reconstructed into three-dimensional maps of structures, allowed the researchers to see the virus in rich detail. However, the team used special analysis to take the study further and noticed signs of motion of the virus-receptor interaction. "This is marvelous—these are the kinds of things we can do with the cryo-electron," said Hafenstein. "This study was actually an application of using the microscope that we didn't even know we could do. Typically, cryo-EM gives you a snapshot at atomic resolution, but by using innovative classification combined with three different asymmetric approaches, we were able to predict this flexibility and movement."

9-23-2019 There's a lady who's sure all that glitters is gold

And she's buying a stairway to heaven.

When she gets there she knows, if the stores are all closed

With a word she can get what she came for.

Ooh, ooh, and she's buying a stairway to heaven.

There's a sign on the wall but she wants to be sure

'Cause you know sometimes words have two meanings.

In a tree by the brook, there's a songbird who sings,

Sometimes all of our thoughts are misgiven.

Ooh, it makes me wonder,

Ooh, it makes me wonder.

There's a feeling I get when I look to the west,

And my spirit is crying for leaving.

In my thoughts I have seen rings of smoke through the trees,

And the voices of those who standing looking.

Ooh, it makes me wonder,

Ooh, it really makes me wonder.

And it's whispered that soon if we all call the tune

Then the piper will lead us to reason.

And a new day will dawn for those who stand long  
And the forests will echo with laughter.

If there's a bustle in your hedgerow, don't be alarmed now,  
It's just a spring clean for the May queen.

Yes, there are two paths you can go by, but in the long run  
There's still time to change the road you're on.

And it makes me wonder.

Your head is humming and it won't go, in case you don't know,

The piper's calling you to join him,

Dear lady, can you hear the wind blow, and did you know

Your stairway lies on the whispering wind.

And as we wind on down the road  
Our shadows taller than our soul.

There walks a lady we all know

Who shines white light and wants to show  
How everything still turns to gold.

And if you listen very hard  
The tune will come to you at last.

When all are one and one is all  
To be a rock and not to roll.

And she's buying a stairway to heaven.

Paris 12 Top-Tier (but Undervalued) Burgundy Producers. Burgundy is glorious. Everybody knows it. And that is a problem. Over the last 20 years, prices for Burgundy, both reds and whites, have rocketed upward as growing demand for the wines has far outrun the supply. Financial trackers might quibble as to whether Bordeaux or Burgundies are the better investments, but ordinary consumers who love to drink Burgundy, not resell it for profit, agree on one thing: Without the resources of a hedge-fund manager, they are mostly out of luck. That is not strictly true. Becky Wasserman, an American wine broker in Beaune who has done more than anybody over the last 40 years to introduce Americans to the best in Burgundy, insists that wonderful wines are available at all prices.**

9-16-2019 "Thunder and Light" Reprint Edition. Marie-Claire Blais's. **These Festive Nights**, and many that she derives from actual news stories:

9-16-2019 Greg in Key West as she is coming out of the writers Colony, Hello Marie-Claire when are you going to write a Novel about Prince Salman now that the Bone Saw Murder and the Canada Students are news? Marie-Claire got in the Yellow convertible on Windsor Lane and drove off... the Earth!! Gregs Amazon book on the seat, secret files on WindmillCAR's.

9-16-2019 Originally published in 2001, **Thunder and Light** is the second volume in Marie-Claire Blais's prize-winning **Soifs** series, hailed as one of the greatest undertakings in modern Quebec fiction. Powered by its characters' gripping exploration of the world's dark corners, the novel is a teeming microcosm in which boundaries collapse and the extremes and contradictions that animate our times are reconciled. Blais locks us directly into the consciousness of her characters, many of whom we met in her previous novel, **These Festive Nights**, and many that she derives from actual news stories: Jessica, a seven-year-old attempting to beat the world record as the youngest pilot to cross the

continent; Nathanaël, a teenager on death row for killing his favorite teacher; Our Lady of the Bags, a modern-day Joan of Arc who lives among Manhattan's skyscrapers and follows the voices in her head; and Caroline and Jean-Mathieu, aging artists who are fighting to come together again. One character's thoughts or actions have consequences for another 3,000 miles away who is a complete stranger to the first. This is an intricate house of cards, delicately but expertly constructed, that shocks us in its perversity and familiarity, ultimately finding hope and redemption in the most human and basic forms of art.

"One day back home in Colorado, I was out hiking when I reached a junction in a sage meadow just ahead of someone else. He was hiking with both hands in his front pockets, and that seemed odd. He looked too beatific and asked me a clueless question about what was ahead. I hurried off, asking myself if I was onto something or off my rocker. Whatever the impetus, I shouted and waved at a friend ahead — who didn't exist. Five minutes later I passed two young women going in the opposite direction, toward the sage meadow. I greeted them, walked by and 10 feet later had to turn around. "Hey, this is strange," I said, "but ... there's a guy back there who seemed weird. I just thought I should tell you." They thanked me and promised to look out. On my way back I picked up a rock, but I never saw the guy. I think I was wrong. Instinct is fallible, I know it is. But it can also be right. Listen." 9-13-2019 Mr. Giuliani insisted that his relationship woes 4 ex-wife's instead of 4 Wife's in a polygamous marriage driven to a Nobel did not affect his stewardship as the mayor of New York City, just as it does not affect his ability to assist Mr. Trump's legal defense. If anything, he said, the president's familiarity with how marital squabbles can be front-page news earned him a fair amount of empathy. Empathy for losing how many Nobels from the Mayor of NYC. This guy should inspire a few Nobels not lose them. Really! Trump walked out on the Nobel for No Tobacco and Giuliani spent \$7,131 on fountain pens and another \$12,012 on cigars. Is this why Trump lost a Nobel in Medicine for sanctions on tobacco, if so its a War Crime by both of them and Humanity the millions who will die until someone wins this Nobel in Medicine. Mr. Giuliani said. "Then he kills his lover," he added. "But I wouldn't do that." He kills one wife after another, her 'Drive' to win a Nobel. Great Guy for Mayor of NYC and Trump Aid. 9-13-2019 "M.I.T. President Says He Thanked Jeffrey Epstein for Gift in Letter" By MARC TRACY and TIFFANY HSU "Mr. Reif said he did not remember signing the thank-you to Mr. Epstein in 2012, four years after Mr. Epstein pleaded guilty to a sex charge involving a minor in Florida and the year before Mr. Ito has said he met Mr. Epstein. "I apparently signed this letter on August 16, 2012, about six weeks into my presidency," he said. "Although I do not recall it, it does bear my signature." MIT lost the Nobel Rx Recipe for a Never Forget Memory for 5 billion people. This MIT president Mr. Reif can remember all the women he had sex with though. Losing a Nobel in Medicine when you are the president of MIT, criminal behavior. I did not take time to understand the gravity of Epstein's offenses or Win for MIT building of the first Gravity Engine Car. Mr. Epstein also helped secure millions of dollars in MIT donations from the Microsoft co-founder Bill Gates that bought no Nobels from MIT Staff a waste of Bill Gates Millions. I

would bet MIT pays Microsoft more for Win 10 and Office 365 than the millions donated by Bill Gates. Late Thursday, Harvard's president, Lawrence S. Bacow, released a statement detailing Mr. Epstein's gifts to that university, which totaled about \$8.9 million and ended in no Nobel inventions from those who got the \$8.9 million.

9-13-2019 Zero Gravity Engine Cars Today; In 2017, there were 225,179 non-taxi cars registered in Manhattan, on par with 2007, when there were 225,047, according to the state Department of Motor Vehicles, which counts cars used for ride-share services like Uber in its

totals. The spikes in the other boroughs have been dramatic. In Brooklyn, there were 457,980 cars in 2017, up from 387,328 in 2007, according to the data, and in Queens there were 725,906, up from 671,816. They could also be used as a concession, to coax hesitant buyers. "It's another asset in the process," he said, "and it becomes a very valuable asset." ## How Jewish Should the Jewish State Be? The Question Shadows an Israeli Vote

The long-simmering conflict between Israel's secular and religious Jews takes center stage in the national election on Tuesday.

9-12-2019 How Jewish Aliens will change the lives of the Jews in the picture above, as these are the Jews who will be at the \$500 Million dollar IBM Super Computers along with the Jew Generals and all their 4 Wife's as Jews will need legal polygamy to invent a way to pick up the live streaming TV of Jewish Aliens at Sirius and it will cost more than Apple TV at \$5. more like \$55 Trillion in technology upgrades to the Jews in the picture above, grin. Will anyone want to watch Jewish Aliens 8 light years from Earth?

The talk of the neighborhood these days is the installation of new bicycle lanes along the park side of the street not this People Pass picture above in NYC.

9-12-2019 These Jews "Exodus HQ" will be at The Dakota, at 1 West 72nd Street, is probably its best-known building. It is where John Lennon lived and was murdered in 1980, a century after construction on the building began. Besides Lennon and his wife Yoko Ono, it has been home to Lauren Bacall, Leonard Bernstein, Roberta Flack, Judy Garland and now Jews leading the Exodus to Sirius, yes a \$500 million dollar IBM super computer can fit in the Dakota and IBM is just across the street for tech support. The talk of the neighborhood these days is the

installation of new bicycle lanes along the park side of the street not Jews with a \$500 million dollar IBM Super Computer grin. Jews Food shopping choices include a Whole Foods at Columbus Avenue and West 97th Street and one at the Time Warner Center, and Schatzie the Butcher on Broadway near West 101st which will have colon cancer graffitti problems when the Jews move in. In 1877, it moved into the first building of the present complex and eventually became the world's largest natural history museum. History of the 1 trillion Jews at Sirius will be moved into the new \$1 Billion dollar IBM Super Computer at the Dakota. Grin.

9-12-2019 Yale and Harvard classroom labs are not in a Nursing Home in New Haven or Boston. Next semester they will be, grin! "Nursing Homes Are a Breeding Ground for a Fatal Fungus. Drug-resistant germs, including *Candida auris*, prey on severely ill patients in skilled nursing facilities, a problem sometimes amplified by poor care and low staffing by Kelly Times and Day Labor Staffing." By ANDREW JACOBS and MATT RICHTEL

9-12-2019 NY Times; "Much of the blame for the rise of drug-resistant infections like *C. auris*, as well as efforts to combat them, has focused on the overuse of antibiotics in humans and livestock, and on hospital-acquired infections." In articles and headlines in the NY Times. But public health experts say that nursing facilities, and long-term hospitals, are a dangerously weak link in the health care system, often understaffed and ill-equipped to enforce rigorous infection control, yet continuously cycling infected patients, or those who carry the germ, into hospitals and back again.

9-12-2019 Much of the blame for *c. auris* deaths is the low tech article and picture in the NY Times of what a high tech "Nursing Home Clean Room" would look like a IBM "Clean Room" making a \$500 million dollar super computer, not on a Boeing 737 assembly line or NY Times editors office. Air is filtered a few times patients are in plastic bubbles and MD's and staff are in NASA space suits, hasmat approved. Articles like this when writing up antibiotic overuse in the Times. This might not be disinformation but alcoholic bonehead like Putin finds in the Kremlin. Putin Medical School would not go with Putin's KGB image. Yet roughly 1,400 nursing homes received a one-star rating for staffing in 2018 from the agency. NY Times received a 1/2 star rating reporting

9-12-2019 On Jan. 1, 2020, a new Medicare policy is scheduled to go into effect that will eventually require doctors to use a computer algorithm to vet imaging tests to determine "appropriateness." If the tests, such as CT scans and M.R.I.s, do not meet certain "appropriate-use criteria," Medicare may not reimburse the cost. Intended to reduce unnecessary imaging, the policy may penalize doctors who don't comply by requiring them to get "prior authorization" before ordering imaging tests in the future — in other words, to follow another regulation. Predictably, many doctors want the policy reversed or at least delayed so that they can come up with an alternative \$500 Million dollar IBM Super Computer with MRI apps and CT Apps with AI of course. Paid for by the 2 White men at 1984 HQ. Like F-35 Radar on all cars and roads cost more than the Ford.

9-10-2019 Millions; "Patients with Sjogren's often have symptoms for years before being diagnosed," Dr. Criswell said. Ms. Divinagracia, for example, had dry mouth for about three years and dry eyes for two years and had attributed her occasional limb pain and fatigue to her demanding workouts. Few doctors are aware of a relatively simple test — an in-office biopsy of tiny salivary glands from the inner surface of the lip — that can be definitive for Sjogren's. As life-disrupting as the syndrome can be, its worst possible consequence is the occurrence of B-cell lymphoma, a cancer of the immune system that afflicts 5 percent to 10 percent of those with primary Sjogren's, a risk 15 to 20 times higher than in the general population. Ideally, patients are best managed by a medical team of Elite Yale MD's who replaced the Elite Navy Seal Teams World Wide. What Star Wars inventions use Liquid helium, search Amazon 1 Click for this not the NY Times. 1 Click Amazon link to reinventing this... To create the liquid and superfluid states, you cool down helium gas to a few degrees above absolute zero. This is achieved by compressing the gas, and then expelling it through a small nozzle. As the gas expands, it rapidly cools (you'll have noticed this effect if you've ever used an aerosol deodorant). The process is repeated until the gas that rushes out of the nozzle is cold enough to condense to a liquid, then if you repeat the cycle a few more times the helium will become cold enough to turn to a superfluid. In more recent decades, liquid helium has been used as a cryogenic refrigerant, and liquid helium is produced commercially for use in super conducting magnets such as those used in magnetic resonance imaging (MRI) Your MRI machine has a gallon of liquid Helium keeping the magnetics cold -252 F.

fired from his trucking job a few hours before he led the authorities on a chaotic high-speed chase that ended with his death and the deaths of seven others. a wrecked postal van the gunman had hijacked. The authorities initially refused to name the gunman on Sunday, wanting not to give him "any notoriety for what he did," said Michael Gerke, the police chief of Odessa. But they later issued a statement identifying the gunman as Seth A. Ator, of Odessa. The gunman sped away from the state troopers who had tried to pull him over, and then hijacked a United States Postal Service van, killed its driver, and began firing at people randomly as he drove. The Postal Inspection Service said Ms. Granados was a letter carrier, that it was "shocked and saddened" at her death, and that it was working closely with other agencies on the investigation. **Andromeda Galaxy contains approximately one trillion stars... CIA report, personalized one by Gina.**

**The 2006 observations by the Spitzer Space Telescope revealed that the Andromeda Galaxy contains approximately one trillion stars, more than twice the number of the Milky Way's estimated 200 to 400 billion stars**

**Hot stars burn brightly in this new image from NASA's Galaxy Evolution Explorer, showing the ultraviolet side of a familiar face. At approximately 2.5 million light-years away, the Andromeda galaxy, or M31, is our Milky Way's largest galactic neighbor. The entire galaxy spans 260,000 light-years across - a distance so large, it took 11 different image segments stitched together to produce this view of the galaxy next door. The bands of blue-white making up the galaxy's striking rings are neighborhoods that harbor hot, young, massive stars.**

Dark blue-grey lanes of cooler dust show up starkly against these bright rings, tracing the regions where star formation is currently taking place in dense cloudy cocoons. Eventually, these dusty lanes will be blown away by strong stellar winds, as the forming stars ignite nuclear fusion in their cores. Meanwhile, the central orange-white ball reveals a congregation of cooler, old stars that formed long ago. When observed in visible light, Andromeda's rings look more like spiral arms. The ultraviolet view shows that these arms more closely resemble the ring-like structure previously observed in infrared wavelengths with NASA's Spitzer Space Telescope. Astronomers using Spitzer interpreted these rings as evidence that the galaxy was involved in a direct collision with its neighbor, M32, more than 200 million years ago. Andromeda is so bright and close to us that it is one of only ten galaxies that can be spotted from Earth with the naked eye. This view is two-color composite, where blue represents far-ultraviolet light, and orange is near-ultraviolet light.
