Vaginal discharge that stinks and is blue is Trichomonas vaginalis is an anaerobic, flagellated protozoan, a form of microorganism. The parasitic microorganism is the causative agent of trichomoniasis, and is the most common pathogenic protozoan infection of humans in industrialized countries. [1] Infection rates between men and women are the same with women showing symptoms while infections in men are usually asymptomatic. Transmission takes place usually directly because the trophozoite does not have a cyst. The WHO has estimated that 160 million cases of infection are acquired annually worldwide. [2] The estimates for North America alone are between 5 and 8 million new infections each year, in the USA. 24 million Chinese women infected each year.

the star is completely convective, causing energy to be transferred to the exterior by the physical movement of plasma rather than through radiative processes. This convection means that the helium ash left over from the thermonuclear fusion of hydrogen does not accumulate at the core, but is instead circulated throughout the star. Unlike the Sun, which will only burn through about 10% of its total hydrogen supply before leaving the main sequence, Proxima Centauri will consume nearly all of its fuel before the fusion of hydrogen comes to an end. Even during quiescent periods with few or no flares, this activity increases the corona temperature of Proxima Centauri to 3.5 million K, compared to the 2 million K of the Sun's corona.

When freed 1,001 Invention Projects on a CD and my web page

A red dwarf with the mass of Proxima Centauri will remain on the main sequence for about four trillion years. As the proportion of helium increases because of hydrogen fusion, the star will become smaller and hotter, gradually transforming from red to blue. Near the end of this period it will become significantly more luminous, reaching 2.5% of the Sun's luminosity and warming up any orbiting bodies for a period of several billion years. Once the hydrogen fuel is exhausted, Proxima Centauri will then evolve into a white dwarf (without passing through the red giant phase) and steadily lose any remaining heat energy.

When freed 1,001 Invention Projects on a CD and my web page

Proxima Centauri has been the closest star to the Sun for about 32,000 years and will be so for about another 33,000 years, after which the closest star to the Sun will be Ross 248. Proxima Centauri may be in orbit around Alpha Centauri, with an orbital period of the order of 500,000 years or more.

BMW is running "Diesel" fueled New 2014 Car commercials when all the Numb Nuts Dictators World Wide have read the Harvard Link to Childhood leukemia written up in the Medical Journal.

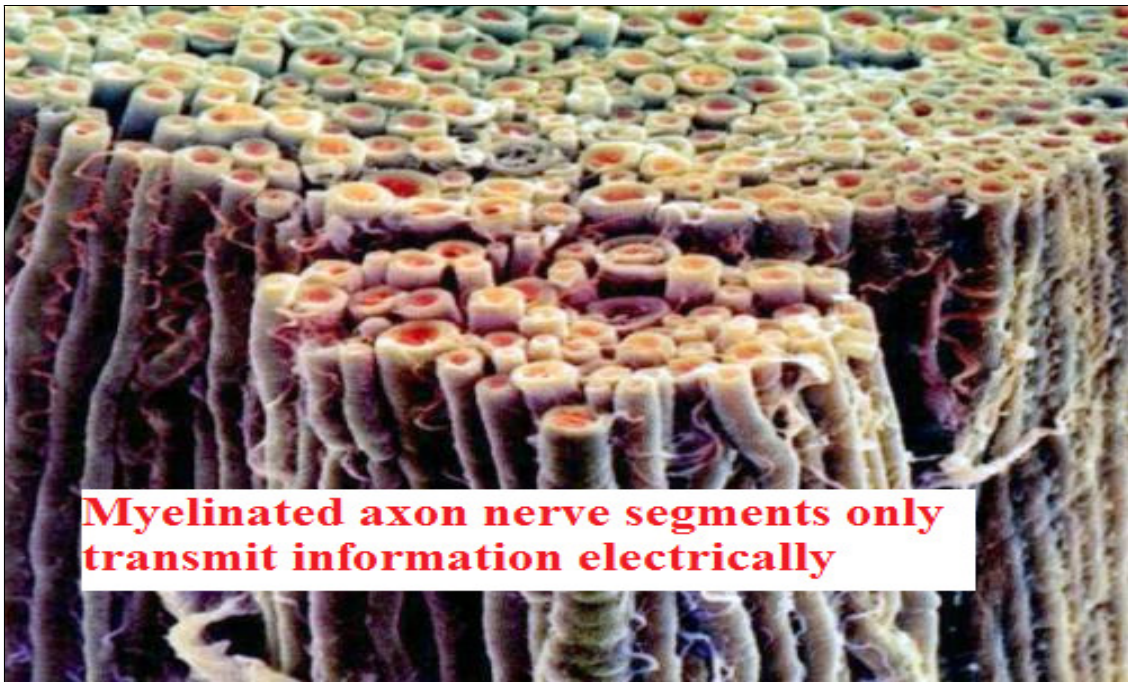

Holocaust III is Obamacare plan as premiums unveiled but not the Operating Room Assembly lines for "Transplants" to get everyone on Earth off the Kidney Dialysis Machines... via Kidney Transplants! America's "Free Health Care Plan" was given to Saudi Arabia along with the Oil Revenues of \$177 Trillion dollars. \$177 Trillion in Oil Revenues is more than enough money to pay for America's "Free Health Care Plan." \$177 Trillion can give HS kids a Free University and Medical School Education.

This is what Bill + Melinda spent most their money on! Win Win 8.1 Lost the Invention Lottery as Verizon didn't send out a Amber Invention Projects Alert about "Black Gonorrhoea" to Harvard + Yale women who went to Africa! Harvard Lawyers will not "Touch" who gave it to them. January 1992 tabloid, The Star named Gennifer as Clinton's mistress. Ask Clinton how many times he has Gonorrhoea. he will lie! Three days later he and wife Hillary appeared on 60 minutes, side by side, flat denying the claim. 60 minutes knew Bill was lying. Six years later Clinton admitted to having sexual relations with Gennifer 'one time'... a lie everyone in the USA KNEW was a lie, Bill didn't care. This is why we need Putin to put "Today's" sex with kids by those rich and famous men. No lies video taped on a Moscow Server! Gennifer Flowers reveals they'd be together now if it wasn't for Chelsea and how former president confided in her that Hillary was bisexual. Clinton taught her everything she knows... Bill told her Hillary was 'bisexual' and that he had 'no problem with that' Hillary had lesbian sex with Huma Abedin her aid. Hillary has watched YouTube videos of Saudi Women Whipped for driving a gasoline engine car! Hillary drove by fiery LA wrecks and didn't stop to help! Thousands of times since 1980.

Yale Lawyers won't sue anyone in New Haven for giving you super gonorrhoea! So now we need a Title for Woody Allen's next movie about this... how about "Black Gonorrhoea"? Orlowski had been speaking with reporters at a news conference Monday about the shooting victims being treated at her facility when she made an impromptu plea... not on TV until Tuesdays Today Show. Orlowski told TODAY's Matt Lauer that while she didn't expect to address the topic, she spoke sincerely. I was "completely spontaneous" when I made an emotional plea to stop gun violence. I meant it," said Dr. Janis Orlowski, chief medical officer of MedStar Washington Hospital Center. "There's something evil in our society that we as Americans have to work to try and eradicate," "There's something wrong here when we have these multiple shootings, these multiple injuries." "I would like you to put my trauma center out of business. I really would. I would like to not be an expert on gunshots." "It was direct from my heart. I meant every word of it," "I must have poked the underbelly because I've gotten quite a few comments and phone calls and emails and tweets about it." I was asked whether Monday's injuries differed from those suffered in other violent events. "My first thought was no, there's nothing different about this," "It's terrible. It's horrific. It's a senseless injury that we deal with." Orlowski said she fears her words may soon fade into the past as quickly as other emotional statements made by parents and friends of shooting victims from other tragedies, including those in Newtown, Conn., and Aurora, Colo.

"Am I worried? Absolutely. What are we going to do as an American people to take care of this?" she said. "Let's stop this now." Innovation to stop killing... Sept. 17, 2013... iPhone 5. And the second was the fingerprint scanner, which offers added security.

Sept. 17, 2013... These are fine evolutions, but not the sort of thing that I think will inspire most folks to rush out the door for a new iPhone.

Sept. 17, 2013... The iPhone 5s offers several new features that represent gigantic leaps forward.

I was immediately excited about several features of the iPhone 5s.

The iSight camera now offers 8 megapixels on both the 5s and 5c. However, on the 5s, the individual pixels are bigger, which means the camera should do better in low-light situations.

The 5s flash also represents a big advance. It's what Apple is calling "True Tone" and it has two LED flashes with two different colors stacked on top of each other.

With the True Tone flash, the phone triggers an initial flash that gauges the colors of the environment. Then the two flashes fire together in different intensities that adjust based on the light in the room. There are 1,000 flash combinations.

Finally, there is a new setting on the iPhone 5s called "burst" that snaps 10 frames per second. Of course, this means you could quickly create hundreds of photos. With iOS 7, the software suggests the best ones and lets you quickly eliminate the others.

And by the way, this ability to capture high-quality images at high frame rates also allows the iPhone 5s to feature a neat slow-motion option for capturing video.

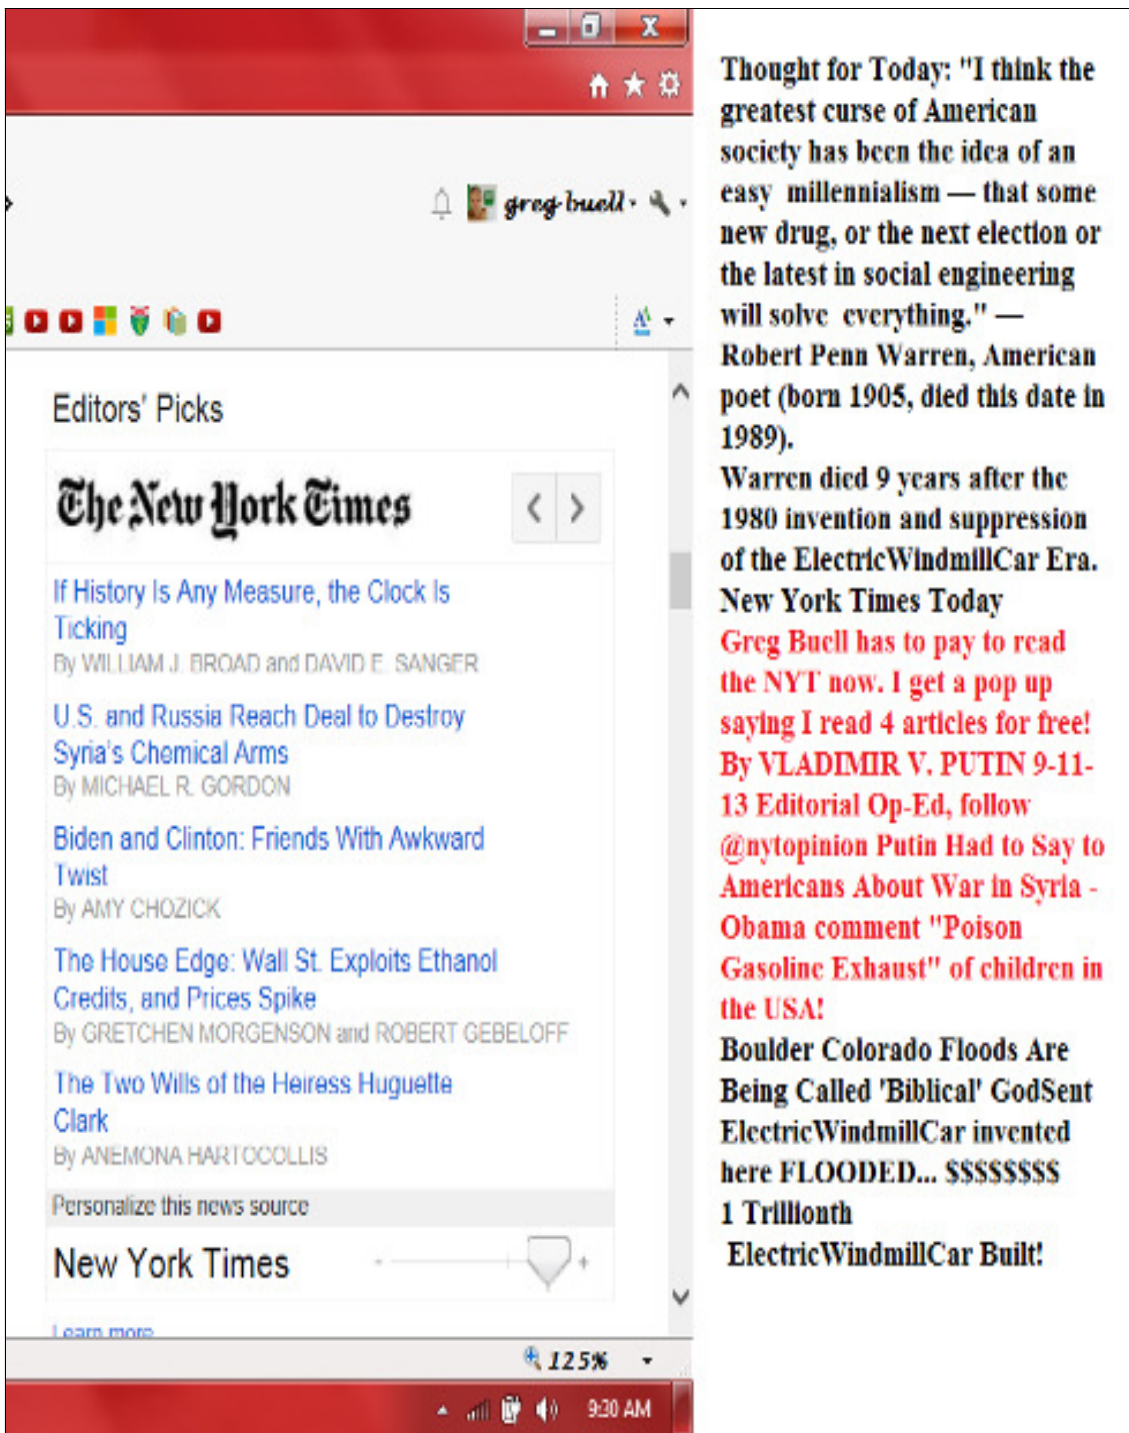

The Centers for Disease Control on Monday confirmed a link between routine use of antibiotics in livestock and growing bacterial resistance that is killing at least 23,000 people a year.

Intel link between "Clean Room" environment... and Yale Med School with No "Clean Room" environment... 100,000 Hospital Acquired infections a year... there is a LINK!

17 Aug 2013 Each day for the past few days, they have gathered at Miami Children's Hospital, hoping that Zachary can overcome a rare "brain-eating" infection in his brain. Called *Naegleria fowleri*, the microscopic single-celled living amoeba is commonly found in freshwater lakes, ponds and rivers and is usually fatal, once it infects humans. The parasite generally enters the body through the nose and travels up to the brain. Once inside, the amoeba can cause a brain infection called primary amebic meningoencephalitis (PAM) and destroy brain tissue.

INS Vikrant touches water today

S. Anandian

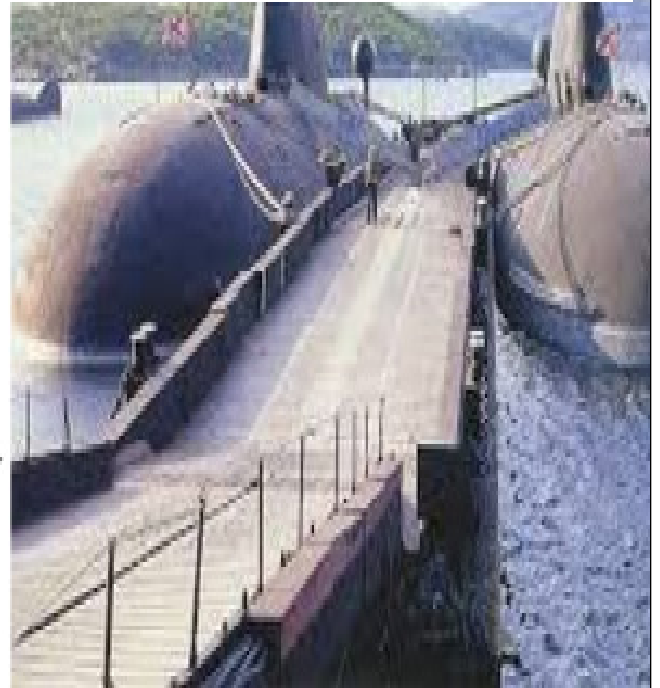

Indigenous aircraft carrier INS Vikrant built by Cochin Shipyard Limited for Indian Navy docked at Kochi on Sunday.

Launch will catapult India into an exclusive club of nations capable of constructing aircraft carriers

It will be a defining moment for warship construction in the country on Monday when the first indigenous aircraft carrier is floated out of its building bay at the State-owned Cochin Shipyard.

The launch will catapult India into an exclusive club of nations capable of constructing aircraft carriers — a daunting task given the architectural and technological complexity and prohibitive cost.

Analysts said the vessel will not only be a symbol of Indian power but also national pride. Its government is anxious to counter China's growing influence in Asia and the Indian Ocean and believes it now has a maritime advantage. The launch follows a successful test of a Prithvi II medium range nuclear missile earlier on Monday and a significant step towards the launch of its first indigenous nuclear submarine, INS Arihant, whose reactor went critical on Saturday. A nuclear-powered aircraft carrier is believed to be in development and a Russian-built carrier is expected to be handed over to the Indian Navy later this year. The flashbacks tell part of the story, 100 kids die in hot cars, 19K women murdered by drunk men every year since 1980, 40K more die a torturous death from breast cancer every year since the invention of the Electric Windmill Car in 1980!

When freed 1,001 Invention Projects on a CD and my web page

26 July 2013 TGIF Scientists have discovered a massive particle accelerator in the heart of one of the harshest regions of near-Earth space, a region of super-energetic, charged particles surrounding the globe called the Van Allen radiation belts. Scientists knew that something in space accelerated particles in the radiation belts to more than 99 percent the speed of light but they didn't know what that something was. New results from NASA's Van Allen Probes now show that the acceleration energy comes from within the belts themselves. Particles inside the belts are sped up by local kicks of energy, buffeting the particles to ever faster speeds, much like a perfectly timed push on a moving swing.

26 July 2013 TGIF The discovery that the particles are accelerated by a local energy source is akin to the discovery that hurricanes grow from a local energy source, such as a region of warm ocean water. In the case of the radiation belts, the source is a region of intense electromagnetic waves, tapping energy from other particles located in the same region. Knowing the location of the acceleration will help scientists improve space weather predictions, because changes in the radiation belts can be risky for satellites near Earth. The results were published in Science magazine on July 25, 2013

26 July 2013 TGIF The Applied Physics Laboratory built and operates the twin Van Allen Probes for NASA's Science Mission Directorate. The Van Allen Probes comprise the second mission in NASA's Living With a Star program, managed by Goddard, to explore aspects of the connected sun-Earth system that directly affect life and society.

TYPHOID FEVER

WHAT IS TYPHOID FEVER?

Etiologic Agent: **Salmonella Serogroup Typhi.**

Typhoid Fever is an acute illness associated with fever caused by the **Salmonella typhi bacteria**. It can also be caused by **Salmonella paratyphi**, a related bacterium that usually causes a less severe illness. Bacteria is deposited in water or onto food by a human carrier or flies & are then spread to other people in the area.

11 July 2013 --- Typhoid fever is one of the oldest documented diseases known to have afflicted mankind but what makes it so lethal has remained a mystery for centuries. In a study appearing online July 10 in the journal Nature, Yale researchers offer an explanation of how the devastating disease marked by delirium and stupor still kills 200,000 people every year - and also suggests the basis of a future vaccine.

11 July 2013 --- *The culprit appears to be a powerful toxin possessed by *Salmonella typhi*, the bacterium that causes typhoid fever.*

11 July 2013 --- *Yale scientists for the first time describe the structure of the typhoid toxin and show that it causes disease in mice. 11 July 2013 --- Although the cause of typhoid fever has been known for over a century, what makes Salmonella typhi so deadly has remained a mystery. "Cooperation is something that's invaluable and instrumental in a successful relationship but men and women experience it differently," Randall said. Brainstorming Invention Projects in an Polygamous Marriage Emotions on... 4 July 2013

Randall and Co-authored by the UA's Jesi Post, Rebecca Reed and Emily Butler, the study has implications for better understanding how romantic partners' emotions are connected.

She and her colleagues found that during high mutual levels of cooperation with a romantic partner, men typically experience an "inphase" response to their significant other's emotions. That is, if the woman in the relationship is feeling more positive, the man will feel more positive. If she feels less positive, he will feel less positive.

On the contrary, it seems women experience more of an "antiphase" pattern during high mutual cooperation. If her partner is feeling more positive, she will tend to feel less positive, and vice versa.

Take, for example, the following familiar scenario: A woman emerges from a department store fitting room and asks her husband what he thinks of a potential new shirt. He likes it, he says, hoping his time at the mall is nearing an end. So does the woman head straight to the cash register and make the purchase? Probably not. Chances are, her husband's enthusiasm won't be enough; she'll want to try on a few more shirts first.

Antisocial Personality Disorder (APD), Those with APD often fit the label sociopath or psychopath. APD is more common in men than in women. In young boys, three traits are correlated with later diagnosis of APD: bedwetting, cruelty to animals and pyromania. Not all children who exhibit these traits develop APD but they are more common in the history of those with APD than they are in the general population. In severe cases of APD, it has been noted that the individuals seem to have no conscience, no guilt, no empathy or concern for others. They can be thrill-seeking and impulsive but show little physiological signs of anxiety or arousal. They can sometimes show signs of conscience, remorse, concern for others and can be quite charming. But these are insincere and actually well-mimicked behaviors to gain the fulfillment of their wishes. Con-artists and serial killers are often diagnosed with APD Antisocial Personality Disorder!

4,609 workers were killed on the job in 2011

Out of 4,188 worker fatalities in private industry in calendar year 2011,

738 or 17.6% were in construction. The leading causes of worker deaths on construction sites were falls, followed by electrocution, struck by object, and caught-in/between. These "Fatal Four" were responsible for nearly three out of five (56%) construction worker deaths in 2011

Falls - 259 out of 738 total deaths in construction in CY 2011 (35%)

Electrocutions - 69 (9%)

Struck by Object - 73 (10%)

Caught-in/between - 18 (2%)

Injury and Fatality Statistics

Household Injuries and Accidents:

More than 30,000 non-fatal shock accidents occur each year.

Each year in the U.S., more than 100,000 people are treated in hospital emergency rooms due to a scalding injury.

Hot tap water accounts for nearly 1 in 4 of all scald burns among children and is associated with more deaths and hospitalizations than any other hot liquid burns.

Each day, nearly 7 children are treated in hospital emergency rooms for electrical shock or burn injuries caused by tampering with a wall outlet.

In 2007, over 98,000 children ages 14 and under were treated for burn injuries in hospital emergency rooms.

4 July 2013 "Invention Acceleration Programs"...

The most common causes of product-related thermal burn injuries among children ages 14 and under are hair curlers, curling irons, room heaters, ovens/ranges, and irons. In 2009, ranges and ovens were involved in an estimated 17,300 thermal burn injuries seen in U.S. hospital emergency rooms.

36% (5,600) of these burn victims were under the age of 5. Heating equipment accounted for 58,660 injuries reported to hospital emergency rooms in 2009.

Space heaters accounted for 19% of the total injuries, but more than two-thirds of the thermal burn injuries.

For every 10 poison exposures in children, approximately 9 occur in the home.

Fatality Statistics:

Each year, there is an estimated average of 60 electrocutions associated with consumer products.

The three most common product categories associated with electrocutions are small appliance, power tool, and lighting equipment.

Every year in the U.S., more than 2,600 people are killed in home fires.

In the U.S., injury is the leading cause of death among children and young adults, and nearly half of these accidents occur in the home, according to the National Safety Council.

Worldwide, accidental injury kills more than 2,000 children each and every day. According to the U.S. Consumer Product Safety Commission, 70 percent of child-related electrical accidents occur at home, when adult supervision is present. Fires and burns are the third leading cause of unintentional death among children 14 and under.

"Invention Acceleration Programs"

Defibrillation is a common treatment for life-threatening cardiac dysrhythmias, ventricular fibrillation, and pulseless ventricular tachycardia. Defibrillation consists of delivering a therapeutic dose of electrical energy to the affected heart with a device called a defibrillator. This depolarizes a critical mass of the heart muscle, terminates the dysrhythmia, and allows normal sinus rhythm to be reestablished by the body's natural pacemaker, in the sinoatrial node of the heart. Defibrillators can be external, transvenous, or implanted, depending on the type of device used or needed. Some external units, known as automated external defibrillators (AEDs), automate the diagnosis of treatable rhythms, meaning that lay responders or bystanders are able to use them successfully with little, or in some cases no training at

all.

Cardiac Arrest Alarms and "Arrest for Top Brass" were turned off by GE

Each year in the United States, about 382,800 people suffer cardiac arrest outside of a hospital, according to the American Heart Association. The life-threatening condition occurs when the heart suddenly stops functioning. Immediate CPR and emergency medical care must be provided within minutes to restore a regular rhythm - or the person will not survive. Once a normal heartbeat is restored, treatment for comatose patients includes therapeutic cooling to decrease the body's oxygen requirements, which can help prevent brain damage associated with the cardiac arrest. American Heart Association and International Liaison Committee on Resuscitation (ILCOR) recommendations are to cool body temperature to 32C-34C, but the optimal temperature within this range is unclear.

More than 300,000 people who go into cardiac arrest out of the hospital die each people each year in the United States; thousands of others are left neurologically devastated.

Women who live in areas with polluted air are up to twice as likely to have an autistic child than those living in communities with cleaner air, according to a new study. Building on two other smaller, regional studies, the Harvard University research is the first to link air pollution nationwide with autism. It also is the first to suggest that baby boys may be more at risk for autism disorders when their mothers breathe polluted air during pregnancy. Babies born in areas with high airborne levels of mercury, diesel exhaust, lead, manganese, nickel and methylene chloride were more likely to have autism than those in areas with lower pollution.

Leukemia is the most common type of cancer in children 3,811 a year and 99% caused by exhaust. GE CEO knows this too! Autism - Mutation of a single chromosome is caused by exhaust molecule! GE CEO Knows this too!

Everolimus may be the new hope for resistant breast cancer

A new study led by researchers from France and presented at the 5th IMPAKT Breast Cancer Conference in Brussels, Belgium, shows that everolimus can overcome trastuzumab resistant breast cancer. The study however showed no statistically significant difference in clinical response rates in some patients with breast cancer when everolimus was added to trastuzumab. This means that the benefit of the everolimus is due to independent molecular mechanisms other than the researchers thought.

Prof Mario Campona, Principal Investigator at the Institute Cancerologie de l'Ouest in Nantes, France, said

Qatar's Emir Sheikh Hamad Bin Khalifa Al Thani, who stripped his father of the title in a 1995 coup, today handed that power to his son, saying the moment for new leadership in the world's richest country had arrived.

"The time has come to turn a new page in our country's journey and see a new generation assume responsibility," Sheikh Hamad said in an address to the nation. The outgoing ruler and his son, Sheikh Tamim Bin Hamad Al Thani, later stood side by side as citizens lined up to pledge their allegiance.

Qatari Crown Prince Sheikh Tamim Bin Hamad Al Thani smiles as he arrives in the Bahraini capital of Manama, on December 24, 2012, to attend the annual Gulf Cooperation Council summit. Photographer: Mohammed Al-Shaikh/AFP via Getty Images Sheikh Tamim, 33, assumes leadership of a country of 1.9 million people that has developed into a regional power during his father's 18-year reign. The emirate bought stakes in Barclays Plc (BARC), the U.K.'s second-biggest bank, and Volkswagen AG (VOW), Europe's largest carmaker. It supported uprisings in Syria and Libya and has lent \$8 billion to Egypt since the ouster of President Hosni Mubarak.

The outgoing emir and his prime minister, Hamad Bin Jassim Al Thani, "put Qatar on the map," Shadi Hamid, director of research at the Brookings Institution's Doha Center, said by phone from the Qatari capital. "There might be some shifts in emphasis and tinkering around the margins, but the main thrust of Qatari foreign policy will continue."

Sheikh Tamim graduated from the U.K.'s Royal Military Academy Sandhurst in 1998 after leaving Sherborne School in England a year earlier, according to the official palace website. The fourth son of Sheikh Hamad, he has steadily acquired power since being appointed crown prince in 2003. He served as chairman of the Qatar Investment Authority, the country's primary sovereign wealth fund, and headed Qatar's failed bid for the 2020 Olympics.

"Historic day for Qatar as new generation takes over," U.K. Foreign Secretary William Hague wrote on Twitter.

Sheikh Tamim inherits power from an emir who transformed Qatar into a regional leader from a fragile, debt-ridden Persian Gulf emirate. Sheikh Hamad ruled as the country's economy grew sevenfold and its population more than tripled. He introduced municipal elections and, a year after assuming power, started Al Jazeera, the Doha-based news network that now operates worldwide.

Today's announcement marks the first voluntary abdication in the emirate since 1960. Sheikh Hamad, 61 this year, overthrew his father, Sheikh Khalifa Bin Hamad Al Thani, in a bloodless coup almost two decades ago. Sheikh Khalifa had deposed his cousin in 1972.

Sheikh Tamim will lead Qatar's effort to expand infrastructure before the 2022 soccer World Cup even as gas exports level off and economic growth slows. The country plans to build a \$35 billion rail network as well as a new port, highways and stadiums.

Qatar, holder of the third-largest gas reserves, produces about 30 percent of the world's supply of liquefied natural gas, which is chilled for transport by ship. Exports of the fuel gave Qatar the largest per capita gross domestic product in the world, according to the International Monetary Fund. The country plans to spend \$200 billion on infrastructure before hosting the most-watched sporting event.

Setbacks Under the outgoing emir, Qatar has also taken on an increasingly prominent foreign-policy role. It's providing financial and military aid to the rebels seeking to oust Syrian President Bashar al-Assad, hosting proposed talks among the Taliban, the Afghan government and U.S. officials, and backing Hamas in Gaza.

There were setbacks, too. In Syria, peaceful protests that started in 2011 have devolved into a bloody civil war. The emirate's support for the opposition was undermined by the rebel loss of the strategic city of al-Qusair in early June.

In Libya, where the emirate sent fighter jets to join NATO against Qaddafi in 2011, Qatar's flag and effigies of the emir were burned last month by protesters in Benghazi who accused Qatar of funding the Muslim Brotherhood. Qatari flags were also burned in Egypt, the Al Ahram newspaper said on April 20.

"It would be good for Qatar to go back to being quiet again," Michael Stephens, a researcher at the Royal United Services Institute in Doha, said in a phone interview. "Half the Arab world hates Qatar right now."

Slowing Growth Economic growth slowed to 6.2 percent last year from 17 percent in 2010, according to a report in May by Qatar National Bank SAQ, the country's largest lender. Citigroup Inc. (C) estimates Qatar's budget surplus will turn to a deficit by 2015. Money from the sovereign wealth fund will start diminishing and some investments may be sold to finance the government, Farouk Soussa, the bank's Dubai-based chief Middle East economist said on May 20.

Qatar Holding LLC, the foreign investment arm of the sovereign wealth fund,

said on June 17 it sold its 10 percent stake in Porsche Automobile Holding SE to the Porsche-Piech family. The fund holds stakes in Total SA (FP), Credit Suisse Group AG (CSGN), Tiffany & Co. (TIF) and owns outright Harrods department store in London.

The emirate's credit risk was little changed yesterday, rising three basis points to 88, according to data compiled by Bloomberg. Abu Dhabi's credit default swaps gained five basis points to 85. The two emirates are rated AA by Standard & Poor's, the third-highest investment grade.

Qatar's gross domestic product will expand 5.2 percent in 2014, faster than Saudi Arabia and the United Arab Emirates, the biggest Arab economies, according to the median estimate in a Bloomberg survey.

Its foreign policy won't change much under Sheikh Tamim, who will probably consult his father, said Ghanem Nuseibeh, the London-based founder of Cornerstone Global Associates.

"This is a bit of internal housekeeping," Nuseibeh said in a phone interview. "We're unlikely to see much change in the way Qatar is run for the time being."

"Invention Acceleration Programs"

70 years of experimental effort has revealed that quarks tend to cluster in quark-antiquark pairs called mesons, triplets of quarks called baryons, and groups of quark triplets, which are the atomic nuclei. More exotic combinations are possible a force that causes interactions between the quarks. Just as two electric charges exert an electromagnetic force on each other through the sharing of photons, quarks are attracted to each other through the sharing of particles called (rather unimaginatively) gluons.

Gluons...

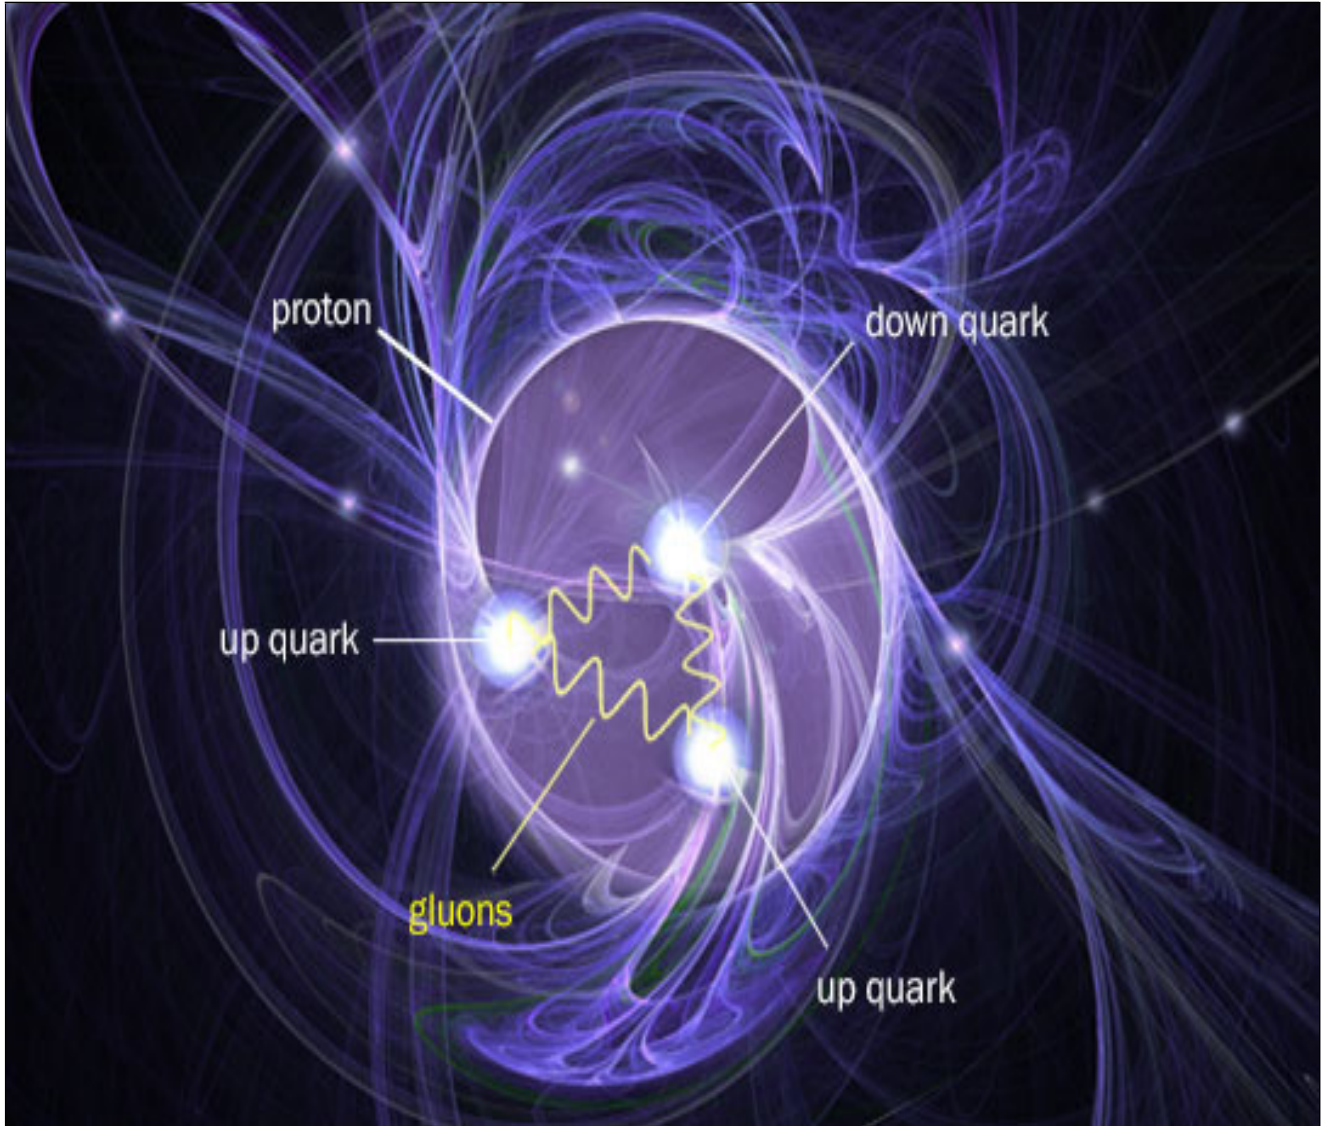

Gravity Generation...

Gravity Generation is never ever mentions in Physics News and even in Physics Classes at Berkeley and MIT - Makes you think why are they not into a "Invention Acceleration Program" to discover how gravity is generated among the Quarks????

Unlike photons, gluons can interact strongly with each other, which can lead to strange combinations not seen in the electromagnetic sector. The $\Upsilon(4260)$ is one such example, as it appears to be made of a charm quark, an

anticharm quark, and an extra gluon. This gluon is not one of the shared gluons but would be a "permanent" member like the quarks. Theorists have even taken this gluon permanence one step further with a hypothetical particle called a "glueball" that would be all gluons, no quarks—like an atom of pure light.

"Invention Acceleration Programs"

It was in seeking to clarify the nature of the enigmatic $\Upsilon(4260)$ that BESIII and Belle discovered another enigma, the $Z_c(3900)$ [1, 2]. Both groups were making $\Upsilon(4260)$ by colliding beams of electrons and positrons, and studying the debris that emerges when the Υ decays (the Υ only lives for about 10-23 seconds). Much of the time, the debris consists of a positive pion (p^+), a negative pion (p^-), and a J/ψ particle. Pions are mesons consisting of up and down quarks and antiquarks, while the J/ψ is a neutral meson made of a charm-anticharm quark pair. But the events with the pions and J/ψ contained a surprise in how the energy was distributed between the three particles. The implication is that the decay goes through an intermediate particle, the Z_c , which is about 4 times heavier than a proton (3900 mega-electron-volts) and decays to a charged pion and a J/ψ . The large mass of the Z_c and its decay to J/ψ implies that it most likely contains charm and anticharm quarks, but this by itself would be a neutral combination, which would violate electric charge conservation. The nonzero net charge of the decay products implies that Z_c must be a charged particle (either positive or negative, depending on the charge of the pion). Therefore, the Z_c must contain other quarks—besides charm and anticharm—that can give the appropriate charge [5]. One such combination is shown in Fig 1 (c), but other four-quark combinations are possible as well. Bound states like this have never been observed before, so many in the particle physics community have been left scratching their heads.

4 July 2013 "Invention Acceleration Programs"...

Alternative explanations of the data exist that are based on less exotic quark-based interactions. One possibility is that the Z_c is not a new particle but is an interaction between two D mesons. These D mesons are a combination of a charm quark with an up or down quark, so they give essentially the same quark content as in Fig. 1 (c). Some models predict that these mesons will be attracted to each other with sufficient strength to explain the data. The difference between this D meson interaction and a new four-quark particle is only a matter of degree, but future experiments studying how the D mesons interact might be able to settle the issue. From the theory side, continued efforts at solving QCD might reveal whether four or more quarks can naturally come together to form a particle. If the four-quark explanation is confirmed, our particle physics zoo will need to be enlarged to include new species. And our understanding of quark taxonomy will have expanded into a new realm.

A flow of positive charges gives the same electric current, and has the same effect in a circuit, as an equal flow of negative charges in the opposite direction. Since current can be the flow of either positive or negative charges, or both, a convention for the direction of current which is independent of the type of charge carriers is needed. The direction of conventional current is defined arbitrarily to be the direction of the flow of positive charges.

In metals, which make up the wires and other conductors in most electrical circuits, the positive charges are immobile, and the charge carriers are electrons. Because the electron carries negative charge, the electron motion in a metal conductor is in the direction opposite to that of conventional (or electric) current.

6-13-13 Lost and stolen cell phones cost consumers more than \$30 billion last year. In New York, police have coined the term "Apple-picking" to describe thefts of the popular iPhone and other mobile products like iPads. While Apple didn't provide many specifics Monday, the new activation lock feature "Kill Switch" is designed to prevent thieves from turning off the "Find My iPhone" app, which allows owners to track their phone on a map, remotely set a passcode and delete their data. The new activation lock apparently would require someone to know a user's Apple ID and password to reactivate a stolen phone, even after a thief erases all the data on the device.

But my other children will never have the chance to know her and experience how loving and gracious she was. We often speak of "Mommy's mommy," and I find myself trying to explain the illness that took her away from us. They have asked if the same could happen to me. I have always told them not to worry, but the truth is I carry a "faulty" gene, BRCA1, which sharply increases my risk of developing breast cancer and ovarian cancer. My doctors estimated that I had an 87 percent risk of breast cancer and a 50 percent risk of ovarian cancer, although the risk is different in the case of each woman. Only a fraction of breast cancers result from an inherited gene mutation. Those with a defect in BRCA1 have a 65 percent risk of getting it, on average. Once I knew that this was my reality, I decided to be proactive and to minimize the risk as much I could. I made a decision to have a preventive double mastectomy.

When freed 1,001 Invention Projects on a CD and my web page

ANGELINA JOLIE I started with the breasts, as my risk of breast cancer is higher than my risk of ovarian cancer, and the surgery is more complex.

When freed 1,001 Invention Projects on a CD and my web page

ANGELINA JOLIE On April 27, I finished the three months of medical procedures that the mastectomies involved. During that time I have been able to keep this private and to carry on with my work.

When freed 1,001 Invention Projects on a CD and my web page

ANGELINA JOLIE Breast cancer alone kills some 458,000 people each year, according to the World Health Organization, mainly in low- and middle-income countries. It has got to be a priority. For any woman reading this, I hope it helps you to know you have options. But I am writing about it now because I hope that other women can benefit from my experience. Cancer is still a word that strikes fear into people's hearts, producing a deep sense of powerlessness. But today it is possible to find out through a blood test whether you are highly susceptible to breast and ovarian cancer, and then take action.

ANGELINA JOLIE I wanted to write this to tell other women that the decision to have a mastectomy was not easy. But it is one I am very happy that I made. My chances of developing breast cancer have dropped from 87 percent to under 5 percent. I can tell my children that they don't need to fear they will lose me to breast cancer.

4-24-13 FBI, CIA + George Bush Presidential Library and Museum Grand Opening TODAY! CIA, FBI analysis is... Grand Opening Should Have Been for a "Presidential Medical School... 4-21-13 10th Year as every semester I posted them. This is how 25K student in Colorado learned of the Suppression of the ElectricWindmillCar.

4-21-13 FBI surveillance of Greg was to protect the \$177 Trillion in BP Oil Revenues

4-21-13 Hell I even dated a FBI women and spent the night in the home of another FBI agent, cooking breakfast and helping to wash dishes. All the time talking about the ElectricWindmillCar!

4-21-13 Tamerlan's father, Anzor, made a living selling used cars - gasoline fueled cars 10 years after the invention of the ElectricWindmillCar in the USA!

4-21-13 Tsarnaev was a boxer, several years ago he told a journalist that he didn't have any American friends. Tsarnaev was arrested in Boston in July 2009 for domestic violence after assaulting his girlfriend, according to a report on the website SpotCrime.com. There was no indication of whether the victim was Russell or another woman. It's unclear when the two got married. Katherine Russell, 24, had a young child with Tamerlan Tsarnaev.

4-21-13 \$177 Trillion in Saudi Oil Revenues went to Muslim wars against Russia!

4-21-13 Putin had \$7 Trillion from Oil Revenues to spend on his war's against the Muslims.

4-21-13 FBI got a call from Moscow about Tamerlan and failed to put a hidden camera with audio in his room, car... and didn't record every call on his cell.

4-21-13 FBI should be working overtime this weekend and next week 1st recording all cell calls from Muslims, then putting in car cams with audio and house cams with audio.

4-21-13 Saudi Arabia whips women who protest not driving a gasoline fueled car. Hillary watched the wack's and kept it Top Secret. Now Saudi Arabia will not let NASA drive 4 light years to the nearest star. Muslims must be bankrupted with the ElectricWindmillCar and 1,001 other inventions. Legal Polygamist Marriages for the FBI and the rest of us who want to Brainstorm 24/7 1,001 invention projects with the wives! This would be against the law in Saudi Arabia... really!

4-21-13 USA news that Tamerlan had been shot dead by police and Dzhokhar captured after a day-long manhunt!

4-21-13 Tamerlan's date of birth - October 21, 1986 - Dzhokhar, born in 1993.

4-21-13 Heat-sensing technology is a common feature in many military vehicles as it strips away the cloak of darkness, or the cover of fog and smoke. Fog can be driven through will be when 1,001 Invention Projects are no longer suppressed.

4-21-13 75 car pile ups with many fiery wrecks behind and in front of huge semi trucks...

4-21-13 Motion Detection Sensors too... FBI has going along with the mass market suppression of invention accessories for the ElectricWindmillCar seeing its suppressed!

4-21-13 FBI surveillance of Making "Polygamist Marriage Legal" and give the wives 1,001 Invention Projects spelled out with links to talk about 24/7 with the loving husband!

4-21-13 NBC never had a kind story on Making "Polygamist Marriage Legal" for 1,001 inventions, like the inventions I just mentioned above. 4-21-13 Greg Buell Lovestar is trying to link them to \$177 Trillion dollars in BP + Saudi Oil Money spent on "War Toys" built at MIT -

So why was the MIT Campus Cop shot 5 or 10 times by the "Brothers"...

4-21-13 MIT is the GE and GMC of "Drone's Inventing + Production" killing 22 1st graders in Pakistan every day of 2013.

4-21-13 Boston Marathon bomber Dzhokhar Tsarnaev was at the University of Massachusetts Dartmouth this week after the explosions killed and injured so many!

4-21-13 He is a registered student at Dartmouth!

4-21-13 Greg is in living in Key West this week out of work because the

Holocaust of suppressing the ElectricWindmillCar is not supported by those who vowed to never let another Holocaust happen, now the Jew's have \$177 Trillion dollars for stifling Greg in Key West

4-21-13 Last week so I wrote up "ElectricWindmillcar-Holocaust" + Genocide... 390 Million died for \$177 Trillion in BP Oil Revenues! From 1980 to 4-21-13.

4-21-13 Now it from 1980 to 4-21-13.

4-21-13 Dzhokhar Tsarnaev was studying medicine in a premed program at Dartmouth.

4-21-13 Key West Mafia has suppressed the Yale Key West Medical School + Hospital since March 4th 2011.

4-21-13 Revenge on these Numb Nuts City of Key West Dictators should be once the Yale Key West Medical School + Hospital is built on Eiffel Tower Structures they should have to drive the deadly highway and 7 Mile Bridge (Gas Tanker head on Crash with Mom Dad 2 Kids in the SUV) to the Jewish Hospitals in Miami!

4-21-13 Back to Dzhokhar Tsarnaev and his older brother Tamerlan. They were ethnic Chechens brothers who had lived in Dagestan, which neighbors Chechnya in southern Russia. Florida Addy, 19, of Lynn, lived on the same dormitory floor as Dzhokhar Tsarnaev last year. She said in a charming way. He usually wore a hoodie!

4-21-13 Obama just wore a Hoodie... it was not charming on Obama, who BP Oil, Exxon-Mobil set up to be arrested for oil Treason, Holocaust, Genocide as 100's of cops just in the USA have been burned and burned to death in fiery wrecks.

4-21-13 Remember 7 Mile Bridge the picture in front of the Gas Tanker on fire is a SUV with mom dad and 2 kids... Obama, the FBI + the CIA have documented all fiery wrecks since 1980... to use this at Obama's Treason Trial.

4-21-13 Addy said she just learned he had a girlfriend who did not attend UMass Dartmouth. The last time she saw him was last week when she bummed a cigarette off him, she said.

4-21-13 Two years ago, Brian Glyn Williams, a UMass Dartmouth professor of Islamic studies, helped Tsarnaev with a high school project about Chechnya.

4-21-13 Two years ago, Brian Glyn Williams, a UMass Dartmouth professor of Islamic studies, helped Tsarnaev with a high school project about Chechnya. "It's sort of sickening," Williams said of the bombings.

4-21-13 "It's sort of sickening," for the FBI + CIA "Observers" who have to document all the fiery wrecks, as "Burn Units" in Miami cost \$ Trillions, BP Oil + Exxon Mobil don't pay a cent and forgot about "Pain" not one cent of the \$177 Trillion in Oil Revenues since the invention of the ElectricWindmillCar when to pay a "Cop" or "Kid" burned in a fiery wreck.

4-21-13 CBS, ABC, NBC will show you several people pulling the driver out of a fiery wreck. That's it! He or She gets nothing from the \$177 Trillion in Oil Revenues!\$

4-21-13 The capture of the Boston Marathon bombing suspect raises a host of freighted legal issues for a society still feeling the shadow of 9/11, including ElectricWindmillCars driving around "Times Square" in front of NBC "Today Show" 10 years before 9/11.

4-21-13 9/11 would never have happened if the ElectricWindmillCar was not

suppressed in 1980 by Carter, his wife Roslyn and Kennedy who bullied them! Attorney General Eric Holder. Under federal law, prosecutors must go through what is known within the Justice Department as a death penalty protocol, under which the U.S. attorney's office and Justice Department lawyers in Washington analyze all aspects of the crime.

4-21-13 Today the DA faces the Capital Crime's Death Penalty. Rome cops died too, in fiery wrecks since 1980.

4-21-13 Pope Frances faces the Penalty of Hell. Pope will tell God, he has already told God many times that the Numb Nuts Dictators World Wide bullied him into the worst Holocaust - Genocide in History!

4-21-13 Rome Cops will arrest Pope Frances just like Pakistan arrested the top General Pervez Musharraf... who has \$1 Trillion in BP Oil money in a Swiss Bank the Same Swiss Bank Hitler Kept his Jewish Money!

4-21-13 Today in Key West the Jewish Mafia, at Pirates Key and Pirates Corner stifle Greg and Wives from working on a Overnight Miracle Cure for Breast Cancer 24/7 on orders from the City of Key West Numb Nuts Dictators who follow orders from the Numb Nuts Dictators McCain, Kerry, Bush, etc.

4-21-13 FBI has the YouTube Videos of Dzhokhar Tsarnaev and his older brother Tamerlan.

4-21-13 FBI has the YouTube Videos of Greg Buell Lovestar, the link is below... Greg's YouTube Video could have prevented 9/11 and the Boston Bombs going off! FBI Failed Humanity because of Numb Nuts Dictators World Wide are alcoholics, drunk on \$177 Trillion in Oil Revenues!\$

4-8-13 Futuristic Utopian Hemingway Novel will spell out each and ever one of the 1,001 ElectricWindmillCar invention needed to get this statistic!

4-8-13 1 Trillion 1 Utopian Inventions in a Hemingway Novel written in a Hemingway Writing Class in Key West will document 1 Trillion 1 Utopian Inventions killed along with the 390 million killed suppressing the ElectricWindmillCar from 1980 to 2013. Even the simple invention of putting a bar code on the new counterfeit proof money the Publix cashiers have to use a marker on - bar coded bills would let Publix cashiers scan the bar code it reads a \$5 or a \$50 and your change is bar code scanned for the correct \$ bills back. Last night in Key West a women had to wait until the "Cashiers" draw was counted and balanced as she gave the "Cashier" a \$20 and the "Cashier" spit out it was a \$10 dollar bill... to much spitting going on in Key West on orders from the Numb Nuts Dictators trying to earn their \$ Bribes \$ for going along with Fiery LA wrecks they must feel guilty about not stopping to Help!

4-8-13 Bill + Melinda's Malaria Mosquitos would drop like the 390 million people, mosquitos flying into "Fog" of H at -254 C with built in fans!

4-8-13 "Fog" and 75 car pile ups with many cars on fire is our Numb Nuts Dictators "Genocide" as this Futuristic Utopian Invention to let traffic drive through "Fog" without crashing went into "Drones" that killed 22 1st graders

in Pakistan yesterday!

4-8-13 *These will be documented in a Futuristic Utopian Hemingway Novel. Spelling out 1,001 brain stormed ideas to prevent deadly wrecks... fiction that would be non fiction if the ElectricWindmillCar was not suppressed by Numb Nuts Dictators World Wide and the Popes.*

4-8-13 *Cirrhosis is most commonly caused by alcoholism... Bartender can't cut you off after taking a Cirrhosis Breath Test in the .99 Cirrhosis Range. Cirrhosis breath test 1.0 the only option is a liver transplant.*

4-8-13 *Yale Key West Medical School will have one assembly line for liver transplants, with everyone brainstorming how to tweak the assembly line and knowing the Coup Leaders will Transfer Homeland Security out of the Social Security Offices Nation Wide to giving all alcoholics the Cirrhosis breath test!*

4-8-13 *Real Terrorists from Saudi Arabia have been selling the Numb Nuts Dictator \$4 gasoline since 1980 amassing \$177 Trillion dollars. \$1 Trillion went to bribe the Presidents of Pakistan, Afghanistan, Iran... and many more \$.*

4-8-13 *"Freedom Tower" Medical School will prevail! After ElectricWindmillCars drive around and around "Times Square" NYC - NYC people will be reminded "Childhood Leukemia" is caused by Deiseal Exhaust and Ford built a 2013 Deiseal Car knowing this!*

4-8-13 *Today Saudi Arabia has free Medicare + Free University and a New Yale Mecca Medical School, which is free, free, free!*

4-8-13 *\$1 Trillion could have bribed North Korea into "Peace" this was voted down by the Pentagon's Shock + Awe of Victory... 50K ElectricWindmillcars were buried in the New Mexico desert at the start of "Desert Storm" in Iraq.*

4-8-13 *City of Key West in the Sunday Citizen is going to buy 5 Electric Cars you plug in... when they all know about the suppression of the ElectricWindmillCar Era!*

4-8-13 *Yale Law School after the Coup will be as unused as it is before the Coup!*

4-8-13 *Law Students are suing the Law Schools as they are not told about the suppression of the ElectricWindmillCar until after they graduate!*

4-8-13 *390 Million People wait for Boeing to build the Helicopter Combines for rice, figs, cashews going to waste today deep in the Amazon... 390 Million Aliens at the Nearest Star Alpha Centauri going to waste...*

4-8-13 *Yale Tokyo Medical School will refuse to use Electricity Generated by GE Nuclear Power Plants, instead they will generate all their Electric needs via cans of H at -254 C which Key West could use to cool the Oil Genocide Warriors down with!*

4-8-13 *Rents for all the "Booths" and "T Shirt Shops" on Duval + Green will double, tipple, as \$177 Trillion in confiscated BP Oil money will buy a Euphoria of Key West Vacations, and construction of the Yale Key West Medical School will help too. Yale Paris Medical School, Yale Rome Medical School, BP Oil and Bill + Melinda Gates built "Zero" Medical Schools and considered "Zero" statistics for murdered women and car wrecks only in a Utopian Futuristic Hemingway Novel they wouldn't finance the writing classes for! And they got off stifling Greg + Wives observed in Key West.*

4-5-13 InventSomething Today as the "Today Show" will never ever (In our Gasoline Era) have a story about the next generation inventing a better "Disulfiram"

4-5-13 "Disulfiram is a drug discovered in the 1920s[1] and used to support the treatment of chronic alcoholism by producing an acute sensitivity to alcohol. It blocks the processing of alcohol in the body by inhibiting acetaldehyde dehydrogenase thus causing an unpleasant reaction when alcohol is consumed. Disulfiram should be used in conjunction with counseling and support. Trade names for disulfiram in different countries are Antabuse and Antabuse manufactured by Odyssey Pharmaceuticals. Disulfiram is also being studied as a treatment for cocaine dependence, as it prevents the breakdown of dopamine (a neurotransmitter whose release is stimulated by cocaine); the excess dopamine results in increased anxiety"

I spent 8 months on this pier in Key West writing 2 handwritten pages a day. I used 50 pages of daily internet notes as reference then I would clip the 2 handwritten pages one on each side of my Acer Windows 7 notebook and write from 5 pm to 10 pm or midnight 5 pages. I did this every day for 8 months only missing 3 days. The link to the 850 pages I wrote is above and below. End of Pier by "Danger Sailboat Charters" I worked ok for months but had to move when the crew blasted the pier with music and loud talking about tips... 6-8-13 A 20-year puzzle as to how the heart regulates contraction appears to have been solved by researchers from the University of Bristol. The findings, published in the journal *Biophysics*, paves the way to improving our understanding of what goes wrong when the heart fails.

6-8-13 When the heart beats (contracts), the contractile machinery is switched on by an increase in calcium within the cell. This increase is produced by a release from intracellular stores activated by a small influx of calcium into the cell during the cardiac electrical signal—known as the action potential. This apparently simple process raised an important question, since the trigger signal was smaller than the release and both involve calcium how could the system be graded - since once the release is started it should overcome the trigger signal and be fully regenerative. A solution to this problem was found by Professor Mark Cannell from the University of Bristol's School of Physiology and Pharmacology and collaborators in the early 1990's—release takes the form of discrete microscopic calcium release events called 'calcium sparks'. It is the time-dependent recruitment of these events that allows the calcium release to be graded. So, although each microscopic event should be fully regenerative, the gradedness relies on each event being independent of all the others and each taking time to occur so that if the trigger is removed, the sites which have not yet produced a calcium spark will not fire. However, this discovery did not explain how the calcium spark itself terminated and this problem has resisted out understanding since then. Many theories have been proposed but all invoked special properties for the release channels which are seen only under special experimental conditions. A team of researchers led by Professor Cannell with Dr Laver from Hunter Medical Research Institute in Australia found a solution. Together, the team constructed a 3-dimensional computer model of the release machinery incorporating measurements of the calcium sensitivity of the release mechanism. They found that the key to this puzzle is in the calcium dependence of the closed time of the channels that release calcium and the microscopic domain in which they reside. This model showed automatic release termination without having to invoke any other mechanism—a process they called 'induction decay'. Therefore, a key piece of the puzzle as how the heart regulates contraction appears to have been solved, and this paves the way to improved understanding of what goes wrong when the heart fails - because there is good evidence that the calcium release mechanism becomes faulty in heart failure. Professor Cannell said: "These intracellular processes only occur on the molecular scale which is difficult, if not impossible, to image and study within living cells."

6-8-13 Thanks to sophisticated computer modeling, we have been able provide the necessary insight into the complex behavior of this fundamental system."
