44 Million couples were videotaped by NSA CIA

6-27-13 "Invention Acceleration Programs"...

44 heterosexual couples who were videotaped having a conversation about their shared lifestyle related to diet and health. The couples were asked to watch the video back and, using a rating dial, provide momentary feedback about how they were feeling emotionally. Researchers analyzed the videos as well as the participants' responses to them.

"Cooperation is something that's invaluable and instrumental in a successful relationship but men and women experience it differently," Randall said. "This research provides another avenue to understanding how partners' emotions can become linked, but future research is needed on how these emotional patterns may ultimately contribute to the longevity, or demise, of the romantic relationship."

Emotions

Randall and Co-authored by the UA's Jesi Post, Rebecca Reed and Emily Butler, the study has implications for better understanding how romantic partners' emotions are connected.

She and her colleagues found that during high mutual levels of cooperation with a romantic partner, men typically experience an "inphase" response to their significant other's emotions. That is, if the woman in the relationship is feeling more positive, the man will feel more positive. If she feels less positive, he will feel less positive.

On the contrary, it seems women experience more of an "antiphase" pattern during high mutual cooperation. If her partner is feeling more positive, she will tend to feel less positive, and vice versa.

Take, for example, the following familiar scenario: A woman emerges from a department store fitting room and asks her husband what he thinks of a potential new shirt. He likes it, he says, hoping his time at the mall is nearing an end. So does the woman head straight to the cash register and make the purchase? Probably not. Chances are, her husband's enthusiasm won't be enough; she'll want to try on a few more shirts first.

"While an extra-marital affair itself is not classified as an "intelligence activity," the investigation by the Federal Bureau of Investigation (FBI) originated with the possible hacking of Director Petraeus' e-mail account, an act that had the potential of compromising national intelligence," the report says.

Antisocial Personality Disorder (APD), Those with APD often fit the label sociopath or psychopath. APD is more common in

men than in women. In young boys, three traits are correlated with later diagnosis of APD: bedwetting, cruelty to animals and pyromania. Not all children who exhibit these traits develop APD but they are more common in the history of those with APD than they are in the general population. In severe cases of APD, it has been noted that the individuals seem to have no conscience, no guilt, no empathy or concern for others. They can be thrill-seeking and impulsive but show little physiological signs of anxiety or arousal. They can sometimes show signs of conscience, remorse, concern for others and can be quite charming. But these are insincere and actually well-mimicked behaviors to gain the fulfillment of their wishes. Con-artists and serial killers are often diagnosed with APD.

4,609 workers were killed on the job in 2011

Out of 4,188 worker fatalities in private industry in calendar year 2011,

738 or 17.6% were in construction. The leading causes of worker deaths on construction sites were falls, followed by electrocution, struck by object, and caught-in/between. These "Fatal Four" were responsible for nearly three out of five (56%) construction worker deaths in 2011

Falls - 259 out of 738 total deaths in construction in CY 2011 (35%) Electrocutions - 69 (9%)

Struck by Object - 73 (10%)

Caught-in/between - 18 (2%)

Injury and Fatality Statistics

Household Injuries and Accidents:

More than 30,000 non-fatal shock accidents occur each year.

Each year in the U.S., more than 100,000 people are treated in hospital emergency rooms due to a scalding injury.

Hot tap water accounts for nearly 1 in 4 of all scald burns among children and is associated with more deaths and hospitalizations than any other hot liquid burns.

Each day, nearly 7 children are treated in hospital emergency rooms for electrical shock or burn injuries caused by tampering with a wall outlet.

In 2007, over 98,000 children ages 14 and under were treated for burn injuries in hospital emergency rooms.

6-27-13 "Invention Acceleration Programs"...

The most common causes of product-related thermal burn injuries among children ages 14 and under are hair curlers, curling irons, room heaters, ovens/ranges, and irons. In 2009, ranges and ovens were involved in an estimated 17,300 thermal burn injuries seen in U.S. hospital emergency rooms.

36% (5,600) of these burn victims were under the age of 5. Heating equipment accounted for 58,660 injuries reported to hospital emergency rooms in 2009.

Space heaters accounted for 19% of the total injuries, but more than two-thirds of the thermal burn injuries.

For every 10 poison exposures in children, approximately 9 occur in the home.

Fatality Statistics:

Each year, there is an estimated average of 60 electrocutions associated with consumer products.

The three most common product categories associated with electrocutions are small appliance, power tool, and lighting equipment.

Every year in the U.S., more than 2,600 people are killed in home fires.

In the U.S., injury is the leading cause of death among children and young adults, and nearly half of these accidents occur in the home, according to the National Safety Council.

Worldwide, accidental injury kills more than 2,000 children each and every day. According to the U.S. Consumer Product Safety Commission, 70 percent of child-related electrical accidents occur at home, when adult supervision is present. Fires and burns are the third leading cause of unintentional death among children 14 and under.

Ventricular fibrillation is a major cardiovascular emergency, so the treatment should be instituted as quickly as possible and is aiming measures of CPR and application of external electric shock of 200-400 joules. If the measures of treatment are not quickly applied, the patient may die.

Prevention of ventricular fibrillation recurrences is achieved by intravenous administration of amiodarone (5-20 mg / kg intravenous infusion for 30-120 minutes, followed by intravenous infusion to a total dose of 1200 mg/24 hours, then is given an oral dose of amiodarone of 100-600 mg / 24 hours), procainamide, lidocaine or tosylate of bretilium. Some patients require implantation of a cardioverter defibrillator.

St. Jude's Quadra Assura MP with MultiPoint Pacing Gets European Go Ahead

by EDITORS on Jun 24, 2013

St. Jude Medical won the European CE Mark for its Quadra Assura MP cardiac resynchronization therapy defibrillator (CRT-D). Like the previously released Quadra Assura, the MP model takes advantage of four electrodes in the compatible Quartel Lead for improved diagnostics and better energy delivery.

In addition, the new device introduces MultiPoint Pacing (MPP), a way by which multiple points on the left side of the heart can be paced concurrently. Electric pulses can be programmed to be delivered simultaneously or sequentially during each pacing cycle.

"Invention Acceleration Programs"

Defibrillation is a common treatment for life-threatening cardiac dysrhythmias, ventricular fibrillation, and pulseless ventricular tachycardia. Defibrillation consists of delivering a therapeutic dose of electrical energy to the affected heart with a device called a defibrillator. This depolarizes a critical mass of the heart muscle, terminates the dysrhythmia, and allows normal sinus rhythm to be reestablished by the body's natural pacemaker, in the sinoatrial node of the heart. Defibrillators can be external, transvenous, or implanted, depending on the type of device used or needed. Some external units, known as automated external defibrillators (AEDs), automate the diagnosis of treatable rhythms, meaning that lay responders or bystanders are able to use them successfully with little, or in some cases no training at all.

Cardiac Arrest Alarms and "Arrest for Top Brass" were turned off by GE

Each year in the United States, about 382,800 people suffer cardiac arrest outside of a hospital, according to the American Heart Association. The life-threatening condition occurs when the heart suddenly stops functioning. Immediate CPR and emergency medical care must be provided within minutes to restore a regular rhythm - or the person will not survive. Once a normal heartbeat is restored, treatment for comatose patients includes therapeutic

cooling to decrease the body's oxygen requirements, which can help prevent brain damage associated with the cardiac arrest. American Heart Association and International Liaison Committee on Resuscitation (ILCOR) recommendations are to cool body temperature to 32C-34C, but the optimal temperature within this range is unclear.

More than 300,000 people who go into cardiac arrest out of the hospital die each people each year in the United States; thousands of others are left neurologically devastated.

Women who live in areas with polluted air are up to twice as likely to have an autistic child than those living in communities with cleaner air, according to a new study. Building on two other smaller, regional studies, the Harvard University research is the first to link air pollution nationwide with autism. It also is the first to suggest that baby boys may be more at risk for autism disorders when their mothers breathe polluted air during pregnancy. Babies born in areas with high airborne levels of mercury, diesel exhaust, lead, manganese, nickel and methylene chloride were more likely to have autism than those in areas with lower pollution.

Leukemia is the most common type of cancer in children 3,811 a year and 99% caused by exhaust. GE CEO knows this too! Autism - Mutation of a single chromosome is caused by exhaust molecule! GE CEO Knows this too!

Everolimus may be the new hope for resistant breast cancer

A new study led by researchers from France and presented at the 5th IMPAKT Breast Cancer Conference in Brussels, Belgium, shows that everolimus can overcome trastuzumab resistant breast cancer. The study however showed no statistically significant difference in clinical response rates in some patients with breast cancer when everolimus was added to trastuzumab. This means that the benefit of the everolimus is due to independent molecular mechanisms other than the researchers thought.

Prof Mario Campona, Principal Investigator at the Institute Cancerologie de l'Ouest in Nantes, France, said

Qatar's Emir Sheikh Hamad Bin Khalifa Al Thani, who stripped his father of the title in a 1995 coup, today handed that power to his son, saying the moment for new leadership in the world's richest country had arrived.

"The time has come to turn a new page in our country's journey and see a new generation assume responsibility," Sheikh Hamad said in an address to the nation. The outgoing ruler and his son, Sheikh Tamim Bin Hamad Al Thani, later stood side by side as citizens lined up to pledge

their allegiance.

Photographer: Mohammed Al-Shaikh/AFP via Getty Images Sheikh Tamim, 33, assumes leadership of a country of 1.9 million people that has developed into a regional power during his father's 18-year reign. The emirate bought stakes in Barclays Plc (BARC), the U.K.'s second-biggest bank, and Volkswagen AG (VOW), Europe's largest carmaker. It supported uprisings in Syria and Libya and has lent \$8 billion to Egypt since the ouster of President Hosni Mubarak.

The outgoing emir and his prime minister, Hamad Bin Jassim Al Thani, "put Qatar on the map," Shadi Hamid, director of research at the Brookings Institution's Doha Center, said by phone from the Qatari capital. "There might be some shifts in emphasis and tinkering around the margins, but the main thrust of Qatari foreign policy will continue."

Sheikh Tamim graduated from the U.K.'s Royal Military Academy Sandhurst in 1998 after leaving Sherborne School in England a year earlier, according to the official palace website. The fourth son of Sheikh Hamad, he has steadily acquired power since being appointed crown prince in 2003. He served as chairman of the Qatar Investment Authority, the country's primary sovereign wealth fund, and headed Qatar's failed bid for the 2020 Olympics.

"Historic day for Qatar as new generation takes over," U.K. Foreign Secretary William Hague wrote on Twitter.

Sheikh Tamim inherits power from an emir who transformed Qatar into a regional leader from a fragile, debt-ridden Persian Gulf emirate. Sheikh Hamad ruled as the country's economy grew sevenfold and its population more than tripled. He introduced municipal elections and, a year after assuming power, started Al Jazeera, the Doha-based news network that now operates worldwide.

Today's announcement marks the first voluntary abdication in the emirate since 1960. Sheikh Hamad, 61 this year, overthrew his father, Sheikh Khalifa Bin Hamad Al Thani, in a bloodless coup almost two decades ago. Sheikh Khalifa had deposed his cousin in 1972.

Sheikh Tamim will lead Qatar's effort to expand infrastructure before the 2022 soccer World Cup even as gas exports level off and economic growth slows. The country

plans to build a \$35 billion rail network as well as a new port, highways and stadiums.

Qatar, holder of the third-largest gas reserves, produces about 30 percent of the world's supply of liquefied natural gas, which is chilled for transport by ship. Exports of the fuel gave Qatar the largest per capita gross domestic product in the world, according to the International Monetary Fund. The country plans to spend \$200 billion on infrastructure before hosting the most-watched sporting event.

Setbacks Under the outgoing emir, Qatar has also taken on an increasingly prominent foreign-policy role. It's providing financial and military aid to the rebels seeking to oust Syrian President Bashar al-Assad, hosting proposed talks among the Taliban, the Afghan government and U.S. officials, and backing Hamas in Gaza.

There were setbacks, too. In Syria, peaceful protests that started in 2011 have devolved into a bloody civil war. The emirate's support for the opposition was undermined by the rebel loss of the strategic city of al-Qusair in early June.

In Libya, where the emirate sent fighter jets to join NATO against Qaddafi in 2011, Qatar's flag and effigies of the emir were burned last month by protesters in Benghazi who accused Qatar of funding the Muslim Brotherhood. Qatari flags were also burned in Egypt, the Al Ahram newspaper said on April 20.

"It would be good for Qatar to go back to being quiet again," Michael Stephens, a researcher at the Royal United Services Institute in Doha, said in a phone interview. "Half the Arab world hates Qatar right now."

Slowing Growth Economic growth slowed to 6.2 percent last year from 17 percent in 2010, according to a report in May by Qatar National Bank SAQ, the country's largest lender. Citigroup Inc. (C) estimates Qatar's budget surplus will turn to a deficit by 2015. Money from the sovereign wealth fund will start diminishing and some investments may be sold to finance the government, Farouk Soussa, the bank's Dubai-based chief Middle East economist said on May 20.

Qatar Holding LLC, the foreign investment arm of the

sovereign wealth fund, said on June 17 it sold its 10 percent stake in Porsche Automobile Holding SE to the Porsche-Piech family. The fund holds stakes in Total SA (FP), Credit Suisse Group AG (CSGN), Tiffany & Co. (TIF) and owns outright Harrods department store in London.

The emirate's credit risk was little changed yesterday, rising three basis points to 88, according to data compiled by Bloomberg. Abu Dhabi's credit default swaps gained five basis points to 85. The two emirates are rated AA by Standard & Poor's, the third-highest investment grade.

Qatar's gross domestic product will expand 5.2 percent in 2014, faster than Saudi Arabia and the United Arab Emirates, the biggest Arab economies, according to the median estimate in a Bloomberg survey.

Its foreign policy won't change much under Sheikh Tamim, who will probably consult his father, said Ghanem Nuseibeh, the London-based founder of Cornerstone Global Associates.

"This is a bit of internal housekeeping," Nuseibeh said in a phone interview. "We're unlikely to see much change in the way Qatar is run for the time being."

"Invention Acceleration Programs"

70 years of experimental effort has revealed that quarks tend to cluster in quark-antiquark pairs called mesons, triplets of quarks called baryons, and groups of quark triplets, which are the atomic nuclei. More exotic combinations are possible a force that causes interactions between the quarks. Just as two electric charges exert an electromagnetic force on each

other through the sharing of photons, quarks are attracted to each other through the sharing of particles called (rather unimaginatively) gluons.

Gluons...

Gravity Generation...

Gravity Generation is never ever mentions in Physics News and even in Physics Classes at Berkeley and MIT - Makes you think why are they not into a "Invention Acceleration Program" to discover how gravity is generated among the Quarks????

Unlike photons, gluons can interact strongly with each other, which can lead to strange combinations not seen in the electromagnetic sector. The $\Upsilon(4260)$ is one such example, as it appears to be made of a charm quark, an anticharm quark, and an extra gluon. This gluon is not one of the shared gluons but would be a "permanent" member like the quarks. Theorists have even taken this gluon permanence one step further with a hypothetical particle called a "glueball" that would be all gluons, no quarks—like an atom of pure light.

"Invention Acceleration Programs"

It was in seeking to clarify the nature of the enigmatic $\Upsilon(4260)$ that BESIII and Belle discovered another enigma, the $Z_c(3900)$ [1, 2]. Both groups were making $\Upsilon(4260)$ by colliding beams of electrons and positrons, and studying the debris that emerges when the Υ decays (the Υ only lives for about 10^{-23} seconds). Much of the time, the debris consists of a positive pion (p^+), a negative pion (p^-), and a J/ψ particle. Pions are mesons consisting of up and down quarks and antiquarks, while the J/ψ is a neutral meson made of a charm-anticharm quark pair. But the events with the pions and J/ψ contained a surprise in how the energy was distributed between the three particles. The implication is that the decay goes through an intermediate particle, the Z_c , which is about 4 times heavier than a proton (3900 mega-electron-volts) and decays to a charged pion and a J/ψ . The large mass of the Z_c and its decay to J/ψ implies that it most likely contains charm and anticharm quarks, but this by itself would be a neutral combination, which would violate electric charge conservation. The nonzero net charge of the decay products implies that Z_c must be a charged particle (either positive or negative, depending on the charge of the pion). Therefore, the Z_c must contain other quarks—besides charm and anticharm—that can give the appropriate charge [5]. One such combination is shown in Fig 1 (c), but other four-quark combinations are possible as well. Bound states like this have never been observed before, so many in the particle physics community have been left scratching their heads.

"Invention Acceleration Programs"

6-27-13 "Invention Acceleration Programs"...

When freed 1,001 Invention Projects on a CD and my web page

6-27-13 "Invention Acceleration Programs"...

Alternative explanations of the data exist that are based on less exotic quark-based interactions. One possibility is that the Z_c is not a new particle but is an interaction between two D mesons. These D mesons are a combination of a charm quark with an up or down quark, so they give essentially the same quark content as in Fig. 1(c). Some models predict that these mesons will be attracted to each other with sufficient strength to explain the data. The difference between this D meson interaction and a new four-quark particle is only a matter of degree, but future experiments studying how the D mesons interact might be able to settle the issue. From the theory side, continued efforts at solving QCD might reveal whether four or more quarks can naturally come together to form a particle. If the four-quark explanation is confirmed, our particle physics zoo will need to be enlarged to include new species. And our understanding of quark taxonomy will have expanded into a new realm.

"Invention Acceleration Programs"

A flow of positive charges gives the same electric current, and has the same effect in a circuit, as an equal flow of negative charges in the opposite direction. Since current can be the flow of either positive or negative charges, or both, a convention for the direction of current which is independent of the type of charge carriers is needed. The direction of conventional current is defined arbitrarily to be the direction of the flow of positive charges.

Jolie is a carrier of a BRCA gene mutation, putting her at a 60 percent to 80 percent chance of developing breast cancer and a 25 percent to 40 percent chance of developing ovarian cancer.

Dr. Amanda Nickles Fader, associate professor and director of the Kelly Gynecologic Oncology Service at Johns Hopkins Hospital, says researchers are studying ways to detect ovarian cancer at an early stage. She talks about bilateral salpingo-oophorectomy.

University of Texas at Austin analyzed 9,510 vaccination-related tweets from one week in January, 2012 to determine the most popular and influential messages. A final sample of 2,580 tweets that had received engagement through re-posting and sharing was then coded for frequency of sharing, tone toward vaccinations, links to sources (e.g., news outlets, advocacy groups, or healthcare providers), and whether the claims being made in each tweet were scientifically substantiated. Overall, 33 percent of the 2,580 tweets carried a positive tone about vaccines!

796 officers were murdered on the job between 1996 and 2010, excluding the deaths of the 72 law enforcement officers killed during the terrorist attacks on September 11, 2001. Over 90 percent of these homicides of officers were committed using firearms, with short-barreled weapons being used 72 percent of the time. In 43 percent of incidents in which an officer was killed, the officer was working alone. In 58 percent of the incidents, the officer was wearing body armor for protection. ANGELINA JOLIE MY MOTHER fought cancer for almost a decade and died at 56. She held out long enough to meet the first of her grandchildren and to hold them in her arms. But my other children will never have the chance to know

her and experience how loving and gracious she was. We often speak of "Mommy's mommy," and I find myself trying to explain the illness that took her away from us. They have asked if the same could happen to me. I have always told them not to worry, but the truth is I carry a "faulty" gene, BRCA1, which sharply increases my risk of developing breast cancer and ovarian cancer. My doctors estimated that I had an 87 percent risk of breast cancer and a 50 percent risk of ovarian cancer, although the risk is different in the case of each woman. Only a fraction of breast cancers result from an inherited gene mutation. Those with a defect in BRCA1 have a 65 percent risk of getting it, on average. Once I knew that this was my reality, I decided to be proactive and to minimize the risk as much I could. I made a decision to have a preventive double mastectomy.

4-24-13 FBI, CIA + George Bush Presidential Library and Museum Grand Opening TODAY! CIA, FBI analysis is... Grand Opening Should Have Been for a "Presidential Medical School... "Yale (Key West) Medical School"... Bush + No Child Left Behind was the catalyst for 1,610 Teachers and Principles to change failed test scores to passing to get \$500K Bonus for each Principle. Worst the FBI, CIA are working on a "USA National Public Libraries" in every City and Town were 1 Billion American Citizens can search every Book + Every Medical Article ever written, and read the Book + New England Journal of Medicine for Free! Few of the 1,610 who changed failed grades to passing were Yale Medical School Professors, knowing these failed MD's will kill, murder patients with their mistakes! Bully Bush is Feared more than God by Pope Frances and Yale Medical School Professors. FBI + CIA can confirm this! Obama yesterday in the White House with Student Inventors praised one with a bike, when the rider peddles it turns a wheel that cleans H₂O... 1 Billion people in Kenya and Africa would have clean H₂O today if 1 Trillion Cans of Hydrogen at -254 C were on the NASA

assembly line, as Bush didn't use any of his \$177 Trillion in BP Oil Revenues since the 1980 invention of the ElectricWindmillCar to buy \$1 Trillion NASA Manufactured cans of H at -254 C that can do a lot more than just provide 1 billion people in Kenya and Africa "Ice Cold Clean Water". FBI, CIA + George Bush Presidential Library and Museum Grand Opening - is a "1984" Scam! Worst case scenarios via CIA, FBI analysis is... Grand Opening Should Have Been for a "Yale (Key West) Medical School" designed futuristically with surgery assembly lines and everyone in a NASA space suit! GE Hospital Commercial with "No Waiting Rooms" - Waiting Rooms Were Designed + Programmed into Every Kaiser Hospital by Kaiser MD's looking out for Kaiser MD's not You waiting for the Coup D'Etat to put a end to BP Oil Holocaust! Does Bush really think MD's who really didn't pass will wash their hands!! Come to work as a MD sick!! You do the math, Bush is a "Stupid Criminal"!! PS Sitting in a waiting room next to someone who is sick, contagious... Kaiser MD's knew this all the time!!

4-21-13 FBI surveillance... Dash Cam with audio in every 2013 ElectricWindmillCar.

4-21-13 FBI surveillance of Dzhokhar + Tamerlan. Cell GPS tracked + caught them! Cell GPS tracking should be a Free add on from Verizon for everyone, not just the FBI. As it would save 100's of lives every day, month, year!

4-21-13 FBI surveillance doesn't include... Hell No! Ability too record this call! Wives like Mary Kennedy tortured to hang herself in the Kennedy Barn would have all Kennedy's threatening torments recorded on her cell! FBI could save 1K womens lives in the rest of 2013 by making this Cell feature Free from Verizon!

4-21-13 Video cameras played a critical role in helping authorities track suspects in this week's Boston bombings.

4-21-13 FBI surveillance of Greg was to protect the \$177 Trillion in BP Oil Revenues

4-21-13 Hell I even dated a FBI women and spent the night in the home of another FBI agent, cooking breakfast and helping to wash dishes. All the time talking about the ElectricWindmillCar!

4-21-13 Tamerlan's father, Anzor, made a living selling used cars - gasoline fueled cars 10 years after the invention of the ElectricWindmillCar in the USA!

4-21-13 Tsarnaev was a boxer, several years ago he told a journalist that he didn't have any American friends. Tsarnaev was arrested in Boston in July 2009 for domestic violence after assaulting his girlfriend, according to a report on the website SpotCrime.com. There was no indication of whether the victim was Russell or another woman. It's unclear when the two got married. Katherine Russell, 24, had a young child with Tamerlan Tsarnaev.

4-21-13 \$177 Trillion in Saudi Oil Revenues went to Muslim wars against Russia!

4-21-13 Putin had \$7 Trillion from Oil Revenues to spend on his war's against the Muslims.

4-21-13 FBI got a call from Moscow about Tamerlan and

failed to put a hidden camera with audio in his room, car... and didn't record every call on his cell.

4-21-13 FBI should be working overtime this weekend and next week 1st recording all cell calls from Muslims, then putting in car cams with audio and house cams with audio.

4-21-13 Saudi Arabia whips women who protest not driving a gasoline fueled car. Hillary watched the wack's and kept it Top Secret. Now Saudi Arabia will not let NASA drive 4 light years to the nearest star. Muslims must be bankrupted with the ElectricWindmillCar and 1,001 other inventions. Legal Polygamist Marriages for the FBI and the rest of us who want to Brainstorm 24/7 1,001 invention projects with the wives! This would be against the law in Saudi Arabia... really!

4-21-13 Tamerlan's date of birth - October 21, 1986 - Dzhokhar, born in 1993.

4-21-13 Heat-sensing technology is a common feature in many military vehicles as it strips away the cloak of darkness, or the cover of fog and smoke. Fog can be driven through will be when 1,001 Invention Projects are no longer suppressed.

4-21-13 75 car pile ups with many fiery wrecks behind and in front of huge semi trucks...

4-21-13 Motion Detection Sensors too... FBI has going along with the mass market suppression of invention accessories for the ElectricWindmillCar seeing its suppressed!

4-21-13 Greg Buell Lovestar is trying to link them to \$177 Trillion dollars in BP + Saudi Oil Money spent on "War Toys" built at MIT -

So why was the MIT Campus Cop shot 5 or 10 times by the "Brothers"...

4-21-13 MIT is the GE and GMC of "Drone's Inventing + Production" killing 22 1st graders in Pakistan every day of 2013.

4-21-13 Boston Marathon bomber Dzhokhar Tsarnaev was at the University of Massachusetts Dartmouth this week after the explosions killed and injured so many!

4-21-13 He is a registered student at Dartmouth!

4-21-13 Greg is in living in Key West this week out of work because the Holocaust of suppressing the ElectricWindmillCar is not supported by those who vowed to never let another Holocaust happen, now the Jew's have \$177 Trillion dollars for stifling Greg in Key West

4-21-13 Last week so I wrote up ElectricWindmillcar-Holocaust" + Genocide... 390 Million died for \$177 Trillion in BP Oil Revenues! From 1980 to 4-21-13.

4-21-13 Now it from 1980 to 4-21-13.

4-21-13 Dzhokhar Tsarnaev was studying medicine in a premed program at Dartmouth.

4-21-13 Key West Mafia has suppressed the Yale Key West Medical School + Hospital since March 4th 2011.

4-21-13 Revenge on these Numb Nuts City of Key West Dictators should be once the Yale Key West Medical School + Hospital is built on Eiffel Tower Structures they should have to drive the deadly highway and 7 Mile Bridge (Gas Tanker head on Crash with Mom Dad 2 Kids in the SUV) to the Jewish Hospitals in Miami!

4-21-13 Back to Dzhokhar Tsarnaev and his older brother Tamerlan. They were ethnic Chechens brothers who had lived in Dagestan, which neighbors Chechnya in southern Russia. Florida Addy, 19, of Lynn, lived on the same dormitory floor as Dzhokhar Tsarnaev last year. She said in a charming way. He usually wore a hoodie!

4-21-13 Obama just wore a Hoodie... it was not charming on Obama, who BP Oil, Exxon-Mobil set up to be arrested for oil Treason, Holocaust, Genocide as 100's of cops just in the USA have been burned and burned to death in fiery wrecks.

4-21-13 Remember 7 Mile Bridge the picture in front of the Gas Tanker on fire is a SUV with mom dad and 2 kids... Obama, the FBI + the CIA have documented all fiery wrecks since 1980... to use this at Obama's Treason Trial.

4-21-13 Addy said she just learned he had a girlfriend who

did not attend UMass Dartmouth. The last time she saw him was last week when she bummed a cigarette off him, she said.

4-21-13 Two years ago, Brian Glyn Williams, a UMass Dartmouth professor of Islamic studies, helped Tsarnaev with a high school project about Chechnya.

4-21-13 Two years ago, Brian Glyn Williams, a UMass Dartmouth professor of Islamic studies, helped Tsarnaev with a high school project about Chechnya. "It's sort of sickening," Williams said of the bombings.

4-21-13 "It's sort of sickening," for the FBI + CIA "Observers" who have to document all the fiery wrecks, as "Burn Units" in Miami cost \$ Trillions, BP Oil + Exxon Mobil don't pay a cent and forgot about "Pain" not one cent of the \$177 Trillion in Oil Revenues since the invention of the Electric Windmill Car when to pay a "Cop" or "Kid" burned in a fiery wreck.

4-21-13 CBS, ABC, NBC will show you several people pulling the driver out of a fiery wreck. That's it! He or She gets nothing from the \$177 Trillion in Oil Revenues!\$

4-21-13 The capture of the Boston Marathon bombing suspect raises a host of freighted legal issues for a society still feeling the shadow of 9/11, including Electric Windmill Cars driving around "Times Square" in front of NBC "Today Show" 10 years before 9/11.

4-21-13 9/11 would never have happened if the Electric Windmill Car was not suppressed in 1980 by Carter, his wife Roslyn and Kennedy who bullied them! Attorney General Eric Holder. Under federal law, prosecutors must go through what is known within the Justice Department as a death penalty protocol, under which the U.S. attorney's office and Justice Department lawyers in Washington analyze all aspects of the crime.

4-21-13 Today the DA faces the Capital Crime's Death Penalty. Rome cops died too, in fiery wrecks since 1980.

4-21-13 Pope Frances faces the Penalty of Hell. Pope will tell God, he has already told God many times that the Numb Nuts Dictators World Wide bullied him into the worst Holocaust - Genocide in History!

4-21-13 Rome Cops will arrest Pope Frances just like Pakistan arrested the top General Pervez Musharraf... who has \$1 Trillion in BP Oil money in a Swiss Bank the Same Swiss Bank Hitler Kept his Jewish Money!

4-21-13 Today in Key West the Jewish Mafia, at Pirates Key and Pirates Corner stifle Greg and Wives from working on a Overnight Miracle Cure for Breast Cancer 24/7 on orders from the City of Key West Numb Nuts Dictators who follow orders from the Numb Nuts Dictators McCain, Kerry, Bush, etc.

4-21-13 FBI has the YouTube Videos of Greg Buell Lovestar, the link is below... Greg's YouTube Video could have prevented 9/11 and the Boston Bombs going off! FBI Failed Humanity because of Numb Nuts Dictators World Wide are alcoholics, drunk on \$177 Trillion in Oil Revenues!\$

Running From Crazy could have taken 1 hour on the "Today Show" talking about Alcohol because she forgot, and Matt Lauer is censored from mentioning Violence Against Women 85% of women murdered is by drunk Men!

4-5-13 InventSomething Today as the "Today Show" will never ever (In our Gasoline Era) have a story about the next generation inventing a better "Disulfiram"

4-5-13 "Disulfiram is a drug discovered in the 1920s[1] and used to support the treatment of chronic alcoholism by producing an acute sensitivity to alcohol. It blocks the processing of alcohol in the body by inhibiting acetaldehyde

dehydrogenase thus causing an unpleasant reaction when alcohol is consumed. Disulfiram should be used in conjunction with counseling and support. Trade names for disulfiram in different countries are Antabuse and Antabuse manufactured by Odyssey Pharmaceuticals. Disulfiram is also being studied as a treatment for cocaine dependence, as it prevents the breakdown of dopamine (a neurotransmitter whose release is stimulated by cocaine); the excess dopamine results in increased anxiety"

4-4-13 Key West 82 F Summer in Key West is Hot for 6 months, our Numb Nuts Dictator will not let Greg + Wives market a cooler with a small can of H at -254 C to keep drinks and food cold and with abundant H at -254 a small fan with H at -254 C behind it would make Key West a Literal Paradise!

4-4-13 Hot Cars in Key West in the Summer are Hell... a cooler with a small can of H at -254 C with a built in fan would finally put an end to getting into a Hot Car! 100 kids will be left to die in Hot Cars again in the Summer of 2013.

4-4-13 Dry Ice in Key West needs to be marketed to Key West Businesses and the Tourists, until our Numb Nuts Dictators World Wide as the Equator needs to be a Paradise with 1,001 Inventions that can use a can of H at -254 C

4-4-13 Bill + Melinda's Malaria Mosquitos would drop like people in 100 F flying into a cafe or back yard with cans of H at -254 C with built in fans!

4-4-13 DA started arresting 1,610 teachers and principles today on the "Today Show" news... arrest of Principles and teachers in "1,610 Schools that cheated for students... debate about paying kids to read a book or write a report well the teachers pocketed \$100 million in cash. I think we should looking into paying the kids \$100 million and see if test scores improve. Our Numb Nuts Dictator will be blackmailed by these teachers threatening to expose the suppression of the ElectricWindmillCar Genocide!

Greg reading the Dictionary. I take notes in red ink, have gotten 101 invention projects ideas marked in last month alone, so don't lose this book is one invention project we must get... grin! I spent 8 months on this pier in Key West writing 2 handwritten pages a day. I used 50 pages of daily internet notes as reference then I would clip the 2 handwritten pages one on each side of my Acer Windows 7 notebook and write from 5 pm to 10 pm or midnight 5 pages. I did this every day for 8 months only missing 3 days. The link to the 850 pages I wrote is above and below. End of Pier by "Danger Sailboat Charters" I worked ok for months but had to move when the crew blasted the pier with music and loud talking about tips... If you come to Key West "Danger Sail Boat" charters are the best buy for islands off Key West... \$100 for the full day I will do this when I get paid for the ElectricWindmillCar or get a job... In Key West this web page has made greg a "Shark" as no one wants the "Observers" who follow me 24/7... like the Movie "Enemy of the State"!

I sent 2 other emails to Mariel but my mouse locked up in Windows 7 and had to tab over to submit so didn't make a copy I could paste here but the just of my email was "Memory" inventing in our current Era of Oil a memory pill Rx for Total Recall. "War + Peace" its Hell just remembering the Characters I would like to write a Utopian Futuristic "War + Peace" full of innovations and of course brainstorm for 100 pages on how we can get the cure for cancer and other diseases, another 100 pages on "assembly line surgery" and building a better Medical School and Today Cheating if 1,610 teachers and principles cheated for decades before our Numb Nuts Dictator arrested them... why did he wait so long and why arrest them now. He has \$177 Trillion dollars so he will not miss all the \$500,000 bonus payment to 1,610 teachers for getting higher scores out of their students?

This is the message I left on Mariel Hemingway's - The WillingWay web page I hope she replies....

http://www.electricwindmillcar.com/ 1,001 invention projects and I use 50 pages of articles then write 2 hand written pages then type these up you can find the link to the 850 pages I wrote in Key West.. I bought Earnest Hemingway's book titled "Research" the A bomb story etc but not much on shock treatments.. as we all know total recall some have better memories than others if I could get ahold of Mayo Clinic electro shock on Earnest 50 pages of notes then get 50 pages on electro shock today with lots of memory articles and write these up into 2 hand written pages then 5 typed this will come out like a Utopian Novel ie in 1933 Hemingway at Capt tonys talked the nave into feed the turtles now today we have Hemingway beach in key west were 1 trillion turtles lay their eggs.. and add in 1 trillion sports fish in key west today because what Hemingway got the navy buddies at capt tonys to feed them in 1933 thanks

6-8-13 A 20-year puzzle as to how the heart regulates contraction appears to have been solved by researchers from the University of Bristol. The findings, published in the journal Biophysics, paves the way to improving our understanding of what goes wrong when the heart fails.

6-8-13 When the heart beats (contracts), the contractile machinery is switched on by an increase in calcium within the cell. This increase is produced by a release from intracellular stores activated by a small influx of calcium into the cell during the cardiac electrical signal—known as the action potential. This apparently simple process raised an important question, since the trigger signal was smaller than the release and both involve calcium how could the system be graded - since once the release is started it should overcome the trigger signal and be fully regenerative. A solution to this problem was found by Professor Mark Cannell from the University of Bristol's School of Physiology and Pharmacology and collaborators in the early 1990's—release takes the form of discrete microscopic calcium release events called 'calcium sparks'. It is the time-dependent recruitment of these events that allows the calcium release to be graded. So, although each microscopic event should be fully regenerative, the gradedness relies on each event being independent of all the others and each taking time to occur so that if the trigger is removed, the sites which have not yet produced a calcium spark will not fire. However, this discovery did not explain how the calcium spark itself terminated and this problem has resisted out understanding since then. Many theories have been proposed but all invoked special properties for the release channels which are seen only under special experimental conditions. A team of researchers led by Professor Cannell with Dr Laver from Hunter Medical Research Institute in Australia found a solution. Together, the team constructed a 3-dimensional computer model of the release machinery incorporating measurements of the calcium sensitivity of the release mechanism. They found that the key to this puzzle is in the calcium dependence of the closed time of the channels that release calcium and the microscopic domain in which they reside. This model showed automatic release termination without having to invoke any other

mechanism—a process they called 'induction decay'. Therefore, a key piece of the puzzle as how the heart regulates contraction appears to have been solved, and this paves the way to improved understanding of what goes wrong when the heart fails - because there is good evidence that the calcium release mechanism becomes faulty in heart failure. Professor Cannell said: "These intracellular processes only occur on the molecular scale which is difficult, if not impossible, to image and study within living cells.

6-8-13 Thanks to sophisticated computer modeling, we have been able provide the necessary insight into the complex behavior of this fundamental system."
