

*Welcome to the Start of Star Traveling*

**Welcome to the Light Year Conquest Corporation**

**Where we shuttle to the Lt. Yrs. + End War on Earth**

LIGHT YEAR CONQUEST CORPORATION  
4.3 LIGHT YEARS TO 2.2 MILLION LIGHT YEARS

**4.3 light years is the nearest star**

**2.2 million Lt. Yrs. is the nearest Galaxy**

**ALPHA CENTAURI 4.3 LIGHT YEARS DOWN RANGE**

*Pope has never mentioned this in a  
Christmas message*

**Alpha and Beta Centauri are in the constellation  
"Centaurus", the Centaur.**

**Hence those names for the stars.**

**The Southern Cross is a different constellation, "Crux",  
the Latin word for cross.**

**The two constellations are next to each other in the  
southern sky, with the front legs of the Centaur on one  
side of the Cross, and the back legs on the other side of it.**

**Alpha Centauri is 4.3 light-years from the Sun, but Beta  
Centauri is 460 light-years from the Sun - more than 100  
times farther away.**

**Alpha is a multiple star system, consisting of two stars  
close to one another, and a third, called Proxima  
Centauri, orbiting that pair at a large distance.**

**At present, Proxima is about 0.1 light-years closer than**

**Alpha and its companion.**
